

## Geely Boyue Car Chassis Parts Connection Front Stabilizer Rod

Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

### Basic Information

- Place of Origin: China Zhejiang
- Brand Name: GEELY
- Model Number: 1014012763
- Minimum Order Quantity: 1
- Price: RMB+25+pc
- Packaging Details: Carton packing, 100 PCS per carton
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+pc+30day

### Product Specification

- Product Name: Geely Original Parts/Boyue Front Stabilizer Rod Connection Rod
- Color: Black
- Material: Steel
- Package: Cartoon
- Quality: Excellent Quality
- Car Make: Geely Boyue
- Highlight: **Geely Boyue Car Chassis Parts, Car Chassis Parts Stabilizer Rod, Geely Boyue car stabilizer rod**

## Product Description

### Geely original parts/Boyue front stabilizer rod connection rod

#### I. Connection and support

The front stabilizer rod connecting rod plays a key role in connecting the front stabilizer rod with the vehicle suspension. Its two ends are connected to the stabilizer and the suspension respectively, forming a stable connection structure to ensure that the stabilizer can function effectively.

#### II. Stabilize the body

Its main function is to enhance the stability of the vehicle during driving. When the vehicle turns, the body will tilt sideways, and the beating of the suspension on both sides is inconsistent. At this time, the front stabilizer connecting rod can transmit the force of the stabilizer to the corresponding suspension part. By limiting the excessive movement of the suspension, it can effectively reduce the transverse tilt of the body, keep the body balanced as much as possible, and improve the handling and driving safety of the vehicle.

#### III. Material and process

The connecting rod is usually made of high-strength metal material, which has good rigidity and durability. It has been carefully processed to ensure that it can work reliably under various complex driving conditions.

#### IV. Adapt to road conditions

Whether driving in the corners of urban roads or changing lanes on highways, the front stabilizer connecting rod of Geely Boyue can play a role. It can help vehicles better cope with the challenges posed by different road conditions, reduce body shaking and instability, and provide drivers with a more stable and comfortable driving experience.

#### V. Synergy

It works with the front stabilizer bar, suspension system and other chassis components of the vehicle to form a complete chassis stability system. The various components cooperate with each other, so that Geely Boyue can maintain a good posture and stability in driving, and improve the overall performance of the vehicle.

#### VI. Quality assurance

In the design and production process, it has undergone strict quality testing and testing to ensure that it meets the high-quality standards of Geely cars. It has reliable quality and long service life, which guarantees the long-term stable operation of the vehicle.

In a word, although the front stabilizer connector of Geely Boyue is not conspicuous, it plays a vital role in the stability and maneuverability of the vehicle. Its excellent design and reliability help to improve the safety and comfort of driving, so that drivers can control the vehicle more confidently under various road conditions.

product name	Geely original parts/Boyue front stabilizer rod connection rod
color	black
material	steel
package	cartoon
quality	excellent quality
