Product Description

Geely geometric C back door through the lamp

the back door running light of Geely Geometry C not only improves the appearance and beauty of the vehicle, but also increases the sense of driving safety and technology. It is an innovative and practical design.

- **Advantages:**
- **Improve recognition:** make vehicles more recognizable at night or in low-light environments.
- **Increased safety:** It can make it easier for vehicles to find vehicles in front of them in the rear and reduce the risk of rear-end collision.
- **Enhance aesthetics:** The penetrating design makes the rear look more fashionable and unique, which is in line with the current aesthetic trend.
- **Create brand characteristics:** it helps to improve the brand image and uniqueness of the vehicle.
- **Principle:** Through the arrangement and control of LED lamp beads, the penetration effect of lighting is realized.

- **Features:**
- **The width of the lamp body:** the width of the lamp body is 1.2 meters, and it adopts a penetrating design.
- **Many LED light sources:** a total of 216 LED light sources are included.
- **Blackened design:** The taillight adopts a blackened design, which looks more sporty and fashionable.

- **Technology:**

- **Light feather technology:** The design of the taillight is inspired by the light feather, which creates a unique visual effect through the refraction and reflection of light.
- **Flowing turn signal technology:** The turn signal adopts a flowing lighting method, which increases the warning effect and sense of technology of the turn signal.
- **Intelligent welcome technology:** It is equipped with "somatosensory recognition welcome mode". When the key is close, the mode is activated, the headlights are lit up, the penetrating taillights are lit from the middle point to both sides, the door handle pops up, and the whole process is full of ritual.

Specification Item	Details
