

Geely Geometry C Auto Electrical Parts EV Accessories Low Speed Alarm Pedestrian Detection

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 7095000900
- Minimum Order Quantity: 1
- Price: RMB+150+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Low-speed Alarm
- Fuel Type: Electric
- Color: Black
- Type: Car Electrical Parts
- Material: Plastic
- Weight: Superlight
- Highlight: Geely Geometry auto electrical parts, auto electrical parts Alarm Pedestrian Detection , ev accessories Alarm Pedestrian Detection

Product Description

Geely geometric C low-speed alarm

The low-speed sound of some Geely Geometry C models can be turned off in the vehicle settings of the central control screen, but this function will be automatically turned on every time the vehicle is started, and it needs to be turned off manually every time you drive. If it needs to be turned off for a long time, it may need to be operated through the manufacturer's specific equipment, or the fuse corresponding to the function is pulled out of the safety box. The low-speed alarm is designed to ensure driving safety. Try to maintain its normal operation in appropriate scenarios to ensure that pedestrians can detect the vehicle in time.

Advantages:

- It can make a prompt sound when driving at low speed, effectively remind the surrounding pedestrians, and improve driving safety, especially in pedestrian areas or quiet environments, which can make it easier for pedestrians to detect the existence of vehicles.

Features:

- A specific sound is usually made to warn the surroundings.

Principle:

It is achieved through relevant sensors and control modules on the vehicle. When the vehicle is at low speed, the sensor detects the speed information, and the control module triggers the alarm to make a sound according to the preset conditions.

Technical aspects:

Specific technical details may involve the electronic system and software control of the vehicle. The control system of the vehicle will determine whether it is necessary to start the low-speed alarm according to the speed and other parameters, and control the alarm to make the corresponding sound.

Product name	low-speed alarm
Fuel type	Electric
Color	Black
Type	Car Electrical Parts
Material	plastic
Weight	superlight
