

## Car Interior Parts Perfect Fit Water Tank/Radiator for Geely Xingyue L Vehicles

Our Product Introduction

### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 8890154097
- Minimum Order Quantity: 1
- Price: RMB+280+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Water Tank/reator Positive Factory
- Color: Black,Silver
- Type: Car Inerior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Xingyue L
- Size: Standard
- Material: Plastic And Aluminum
- Highlight: **Car Interior Parts Water Tank,  
Radiator Water Tank,  
Geely Xingyue L Water Tank**

## Product Description

### Geely Xingyue L water tank/reator positive factory

Xingyue L water tank/ radiator factory products perform well in terms of quality, performance and adaptability, which can provide a reliable guarantee for the cooling system of the vehicle.

Advantages:

1. Reliable quality: After strict quality testing and production standards, it has strong durability and reduces the risk of failure.
2. Accurate adaptation: It is perfectly matched with the Xingyue L model to ensure accurate installation and does not affect vehicle performance.
3. Good heat dissipation performance: it can effectively reduce the engine temperature, maintain the normal working state of the engine, and extend the service life of the engine.

Principle:

The water tank achieves heat dissipation through the circulating flow of coolant between the engine block and the water tank. The heat generated by the engine is absorbed by the coolant. When the coolant flows through the water tank, the heat is emitted into the air through the metal heat sink of the water tank, and the cooled coolant flows back to the engine for circulation.

Features:

1. High-quality materials: high-quality metal materials, such as aluminum alloy, have good thermal conductivity and corrosion resistance.
2. Reasonable structural design: including the arrangement of heat sinks and the shape of the water tank to improve heat dissipation efficiency.
3. Good sealing: prevent the leakage of coolant and ensure the normal working pressure of the cooling system.

Technology:

1. High-efficiency heat dissipation technology: improve the heat dissipation area and air circulation efficiency by optimizing the shape, spacing and thickness of the heat sink.
2. Advanced manufacturing process: ensure the accuracy and quality stability of the water tank.
3. Stress test technology: Conduct strict pressure test in the production process to ensure that the water tank can withstand the pressure changes when the vehicle is working.

Product name	water tank/reator positive factory
Color	Black,Silver
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car model	Geely Xingyue L
Size	Standard
Material	plastic and aluminum
