

Xingyue L Auto Car Body Parts And Accessories Door Anti Friction Strip

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 6073120000
- Minimum Order Quantity: 1
- Price: RMB+150+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Door Anti-friction Strip
- Size: OEM Standard Size,Standard
- Type: Car Body Parts
- Material: Plastic
- Color: Black,white Or As Requirement
- Packing: Carton,normal
- Car Make: Geely Xingyue L
- Quality: Genuine Product,High Level
- Highlight: **Car Body Parts Anti Friction Strip,
Car Body Parts Door Strip,
auto parts and accessories Door Strip**

Product Description

Geely Xingyue L door anti-friction strip, factory

The Xingyue L door anti-friction strip of the factory is excellent in protecting the door, adaptability and appearance.

Advantages:

1. Perfect adaptation: It accurately matches the size and shape of the Xingyue L door, and the fit is high after installation, which does not affect the overall beauty of the vehicle.
2. Reliable quality: After strict quality testing, the material is durable and can be used for a long time without being damaged.
3. Good protection effect: effectively prevent the damage to the door caused by slight scratching and reduce maintenance costs.

Principle:

The anti-friction strip of the door is usually installed in the most vulnerable part of the door. When the vehicle has slight contact with other objects, the anti-friction strip first withstands collision and friction, thus protecting the paint surface of the door body from damage.

Features:

1. Excellent material: Generally, materials with certain elasticity and wear resistance are used, such as rubber, plastic or composite materials.
2. Appearance coordination: The design is integrated with the overall style of the vehicle, and the color and texture match the body.
3. Firm installation: through a special fixation method to ensure that it is not easy to fall off during use.

Technology:

1. Impact resistance technology: so that the anti-friction strip can withstand a certain degree of impact without deformation or cracking.
2. Weather-resistant technology: It can adapt to different climatic conditions and is not easy to age, fade or deform.
3. Surface treatment technology: with good anti-fouling and easy-to-clean performance.
