Product Description

Geely Xingyue L wheel eyebrow, factory

The following are the relevant characteristics of Geely Xingyue L wheel eyebrows:

Advantages:

1. Protective effect: effectively prevent scratches and bumps on the side of the car body caused by mud and stones rolled up by the wheels, and protect the paint surface of the car body.
2. Enhance beauty: improve the overall appearance of the vehicle and increase the sense of movement and fashion of the vehicle.
3. Reduce wind resistance: optimize the aerodynamic performance of the vehicle to a certain extent, reduce wind noise and driving resistance.

Principle:

The eyebrow is installed in the body position above the wheel, forming a barrier for blocking and protection.

Features:

1. Various materials: plastic, rubber or composite materials may be used, with certain flexibility and durability.
2. Fit design: close to the body line, in line with the overall shape of the vehicle.
3. Color matching: usually coordinate with the color of the body, or use two-color matching to increase the visual effect.

Technology:

1. Injection molding technology: ensure the shape and dimensional accuracy of the eyebrow.
2. Surface treatment technology: good weather resistance and corrosion resistance.

Function:

1. Protective body: reduce the damage of external objects to the body.
2. Decorative vehicle: improve the appearance of the vehicle.

Workmanship:

The Geely Xingyue L wheel eyebrow of the factory is fine in workmanship, the edges are smooth and burr-free, and the installation hole is accurate. After installation, it is firm and there is no loosening.
