

ODM Geely Xingyue L Car Electrical Parts Multimedia Display

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhejiang
- Brand Name: GEELY
- Model Number: 7080000500
- Minimum Order Quantity: 1
- Price: RMB+4000+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Multimedia Display (black, 12.3 Inches, Desai Xiwei, KX11, KX11-J1) Factory
- Fuel Type: Electric
- Color: Black
- Material: Plastic
- Type: Car Electrical Parts
- Car Make: Geely Xingyue L
- Highlight: **ODM Car Electrical Parts,
Car Electrical Parts Multimedia Display,
ODM car multimedia display**

Product Description

Geely Xingyue L multimedia display

The multimedia display of Geely Xingyue L is a large electronic screen in the center console area of the vehicle, which is an important part of the information interaction and entertainment system in the car.

- **Advantages:**
- **Display effect:** using a high-resolution screen, which can present clear and bright images and videos;
- **Rich functions:** It integrates a variety of multimedia functions, such as navigation, music, video playback, etc., to meet the diversified needs of users;
- **Strong interactivity:** It supports touch operation, and users can control it by gestures or touching the screen, which is convenient and fast;
- **Good connectivity:** Bluetooth, USB and other connection methods are convenient for connection and data transmission with mobile phones and other devices;
- **Intelligent interconnection:** It can be interconnected with other systems of the vehicle to realize information sharing and interaction, such as working with the vehicle's sound system, driver assistance system, etc.

- **Features:**
- **Large screen:** usually has a large screen size to provide a better visual experience;
- **High-definition display:** with high resolution and good color performance, making images and text clearer;
- **Personalized settings:** Allow users to personalize settings according to their own preferences, such as themes, wallpapers, etc.;
- **Multi-screen interaction:** Support interaction and information sharing with other screens (such as dashboards, co-pilot screens, etc.).

- **Principle:**
- **Liquid crystal display technology:** use the arrangement of liquid crystal molecules and the refraction of light to achieve image display;
- **Touch sensing technology:** The touch sensor detects the user's touch operation and converts it into an electrical signal for processing.

- **Technology:**
- **Intelligent driving assistance:** including intelligent driving assistance, lane keeping system, blind spot monitoring system, intelligent lane change assistance, speed limit sign recognition, door opening warning system, etc., which effectively relieve driving fatigue and bring security to lane change;
- **Multi-screen smooth linkage:** composed of full LCD instrument, central control multimedia touch screen, co-driver multimedia touch screen, and AR-HUD form a four-screen system with a strong sense of technology - "Vision Scroll". Based on the "full configuration" hardware and the powerful computing power support of Qualcomm Snapdragon 8155 chip, Yikatong Technology deeply empowers Geely Galaxy OS to raise the intelligent interaction ability of Xingyue L to a new height, giving birth to a new way of human-vehicle interaction;
- **Visible control:** As long as you open the "Vehicle Basic Settings Interface", all the functions of the vehicle can be adjusted and the real-time status of the vehicle can be seen at a glance. Not only can the air volume, sunroof and seats be easily adjusted, but also the "visible" parts such as rearview mirror, trunk, lighting settings, etc. can be controlled in this interface.

- **Workmanship:**
- **Exquisite appearance design:** the frame and shell of the display screen may be made of high-quality materials, which have been finely processed and processed to make it have good texture and aesthetics;
- **Stable structure:** the internal structure design is reasonable, which can ensure the stability and reliability of the display screen;
- **Strict quality control:** During the production process, strict quality inspection and testing may be carried out to ensure that the quality of the display screen meets the standards.
