

Geely Xingyue L Front Left Seatbelt Replacement Pre Tightening Adjustable

Our Product Introduction

Basic Information

- Place of Origin: China zhejiang
- Brand Name: GEELY
- Model Number: 8040081000
- Minimum Order Quantity: 1
- Price: RMB+230+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Front Left Seat Belt
- Color: Black
- Application: Protection
- Package: Cartoon
- Quality: Excellent Quality
- Car Make: Geely Xingyue L
- Highlight: **Geely seatbelt replacement,
Adjustable seatbelt replacement,
Pre Tightening front seat belt replacement**

Product Description

Geely Xingyue L front left seat belt

The front left seat belt of Geely Xingyue L has the following characteristics:

Advantages:

1. High strength: It can withstand large tensile force and provide reliable protection in emergency situations.
2. Comfort: Under the premise of ensuring safety, provide a certain degree of comfort and reduce the oppression of drivers and passengers.

Principle:

When the vehicle decelerates or collides sharply, the taper of the seat belt will quickly lock the ribbon to prevent the driver and passenger from rushing forward and fixing the person to the seat to reduce the risk of injury.

Technology:

1. Pre-tightening technology: tighten the seat belt in advance at the moment of collision to better restrain drivers and passengers.
2. Force limiting technology: When the tensile force reaches a certain level, appropriately relax the pulling force of the ribbon to avoid causing excessive damage to personnel.

Workmanship:

1. Excellent material: high-strength fiber material, wear-resistant and durable.
2. Fine stitching: ensure that the seat belt is firmly connected, and it is not easy to cause problems such as untitching.

Features:

1. Adjustable: The length and height can be adjusted according to the figure and sitting posture of the driver and passenger.
2. Clear identification: there are obvious use prompts and warning signs.

Function:

1. Constraint: In the driving of the vehicle, especially in sudden situations, effectively restrain the body of the driver and passenger to prevent collision with hard objects in the car or being thrown out of the car.
2. Dispersive impact: Disperse the impact caused by the collision to the strong parts of the body to reduce the degree of injury.

In a word, the left seat belt in the front row of Geely Xingyue L plays an important role in ensuring the safety of drivers and passengers.
