

## OEM Geely Xingyue L Car Electrical Parts Airbag Computer Control Module

Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

### Basic Information

- Place of Origin: China zhejiang
- Brand Name: GEELY
- Model Number: 8037020800
- Minimum Order Quantity: 1
- Price: RMB+460+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Airbag Computer Airbag Control Module
- Fuel Type: Electric
- Color: Black
- Type: Car Electrical Parts
- Weight: Superlight
- Carmake: Geely Xingyue L
- Highlight: Car Electrical Parts Computer Control Module, Car Electrical Parts Airbag Control Module, Geely Xingyue Airbag Computer Control Module

## Product Description

### Geely Xingyue L airbag computer airbag control module

Geely Xingyue L airbag computer airbag control module has the following characteristics:

Advantages:

1. Quick response: It can judge the severity of the collision and trigger the corresponding airbag in a very short time.
2. Accurate judgment: accurately identify the type and strength of the collision to avoid accidental triggering or missing triggering.
3. High reliability: ensure stable work in various complex working conditions and environments.

Principle:

Collect collision-related data through multiple sensors installed on the vehicle (such as acceleration sensors, etc.), such as collision direction, speed change, etc. The airbag computer quickly analyzes and processes these data, and determines whether to trigger the airbag and which airbags are triggered according to the preset algorithm and threshold.

Technology:

1. Advanced algorithms: adopt complex mathematical models and algorithms to improve the accuracy of judgment.
2. Self-diagnosis function: It can self-detect faults and store relevant fault codes, which is convenient for maintenance personnel to diagnose and repair.

Workmanship:

1. High-quality electronic components are used to ensure long-term stable operation.
2. It has a good protection design and can resist unfavorable factors such as vibration, high temperature and humidity during vehicle driving.

Features:

1. Small and compact: easy to install in a suitable position inside the vehicle.
2. Updateability: Software can be updated through specific devices to meet new safety standards and vehicle improvement needs.

Function:

1. Control the trigger of the airbag: in the event of a collision, control the unfolding of the airbag in a timely and accurate manner to protect the safety of drivers and passengers.
2. Data recording: Record the relevant data at the time of collision to provide a basis for accident analysis and subsequent safety improvement.

To sum up, the airbag computer airbag control module of Geely Xingyue L plays a crucial role in the passive safety system of the vehicle.

Product name	airbag computer airbag control module
Fuel type	Electric
Color	Black
Type	Car Electrical Parts
Weight	superlight
carmake	Geely Xingyue L

WARNING: ALWAYS DISCONNECT THE ELECTRICAL CONNECTOR BEFORE DISMOUNTING THIS UNIT.  
REFER TO SERVICE MANUAL. TILTING OF A CONNECTED UNIT CAN LEAD TO DEPLOYMENT OF  
AIRBAG SYSTEM WHICH MAY CAUSE PERSONAL INJURY.  
THIS UNIT CONTAINS VEHICLE SPECIFIC FUNCTIONAL DATA. IN CASE OF MALFUNCTION  
REFER TO SERVICE MANUAL.

警告：拆装前取下全部接插件，参见服务手册，连接模块倾斜放置将导致安全气囊系统引爆
