

Precision Automotive Car Wheel Hub Bearing Accessories For Geely Xingyue L

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhejiang
- Brand Name: GEELY
- Model Number: 4048088500
- Minimum Order Quantity: 1
- Price: RMB+270+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Hub Bearing
- Size: OEM Standard Size,Standard
- Type: Car Body Parts
- Material: Steel
- Color: Silver
- Packing: Carton,normal
- Car Make: Geely Xingyue L
- Quality: Genuine Product,High Level
- Highlight: **Geely Xingyue L car hub bearing, precision car hub bearing, precision automotive wheel hub**

Product Description

Geely Xingyue I hub bearing

Geely Xingyue L hub bearings have the following characteristics:

Advantages:

1. High precision: It can provide accurate rotation support to ensure the smooth operation of the wheels.
2. Long life: it has good wear resistance and fatigue resistance, which prolongs the service life.
3. Low noise: The noise generated during operation is small, which improves driving comfort.

Principle:

The hub bearing is a rolling bearing installed between the hub and the axle. Its function is to reduce the friction resistance when the wheel rotates and withstand the axial and radial loads from the wheel. Relative movement is achieved through the rolling of balls or rollers between the inner and outer rings.

Technology:

1. Sealing technology: Adopt an effective sealing design to prevent dust, moisture and impurities from entering the bearing, and protect grease and ball/roller.
2. Material optimization: choose high-strength, high-wear-resistant steel and high-quality lubricating materials.

Workmanship:

1. Fine processing: the manufacturing accuracy of inner and outer rings, balls/rollers is high, and the surface finish is good.
2. Strict assembly: ensure that the cooperation between the parts is close and not loose.

Features:

1. Compact structure: compact design saves installation space.
2. Easy to install and maintain: It is relatively convenient to replace during vehicle maintenance.

Function:

1. Support wheels: withstand the weight of the vehicle and the dynamic load in driving.
2. Ensure rotation accuracy: enable the wheels to rotate smoothly and accurately, and improve the handling performance and driving stability of the vehicle.
3. Reduce friction: reduce energy loss and improve fuel economy.

Product name	hub bearing
Type	Car Body Parts
Size	OEM Standard Size,Standard
Material	Steel
Color	silver
Packing	Carton,normal
Car make	Geely Xingyue I
Quality	Genuine product,High Level
