

4048087100 Front Brake Disc Car Body Accessories OEM

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhejiang
- Brand Name: GEELY
- Model Number: 4048087100
- Minimum Order Quantity: 1
- Price: RMB+240+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

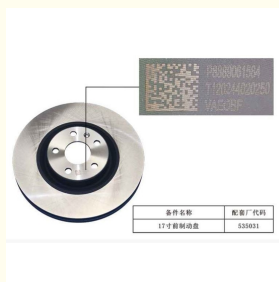

Product Specification

- Product Name: Front Brake Disc
- Size: OEM Standard Size,Standard
- Type: Car Body Parts
- Material: Steel
- Color: Silver
- Packing: Carton,normal
- Car Make: Geely Xingyue L
- Quality: Genuine Product,High Level
- Highlight: **OEM front brake disc, Car Body front brake disc , car body accessories Brake Disc**

Product Description

Geely Xingyue I front brake disc

Geely Xingyue L front brake disc has the following characteristics:

Advantages:

1. Good heat dissipation performance: It helps to quickly dissipate the heat generated during the braking process, reduce thermal decline, and ensure the stability of the braking effect.
2. High wear resistance: prolong the service life and reduce the frequency of replacement.
3. Accurate braking response: It can quickly respond to braking operation and provide timely and effective braking.

Principle:

When stepping on the brake pedal, the piston in the brake caliper pushes the brake pad to contact the brake disc, generating friction and converting the kinetic energy of the vehicle into thermal energy, thus realizing braking.

Technology:

1. Ventilation design: By setting up a ventilation channel inside the brake disc, the air circulation is enhanced and the heat dissipation efficiency is improved.
2. Material innovation: High-performance alloy materials may be used to improve strength and heat resistance.

Workmanship:

1. High-precision machining: ensure the flatness and roundness of the brake disc, and reduce brake jitter and noise.
2. Surface treatment: anti-rust and wear-resistant treatment to extend the service life.

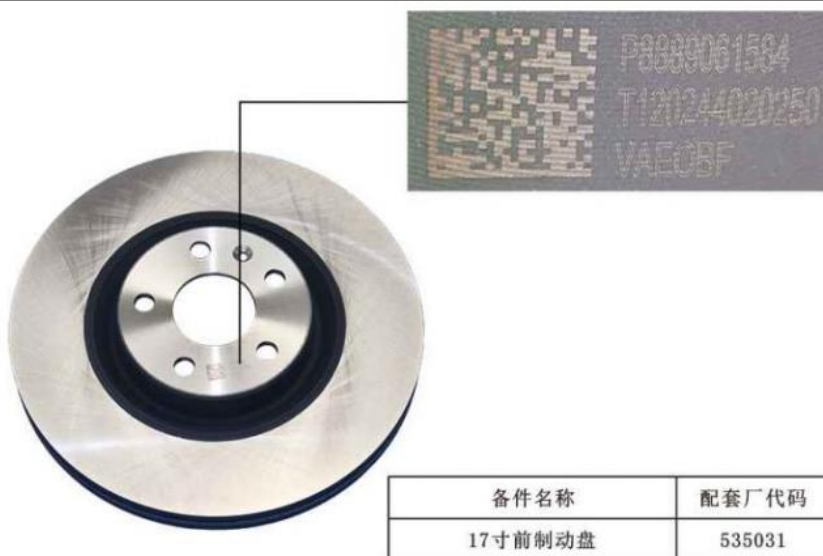

Features:

1. Large size: Provide a larger friction area and enhance braking capacity.
2. Optimized air duct layout: make the ventilation effect more ideal.

Function:

1. Generate friction: work with brake pads to realize the braking and deceleration of the vehicle.
2. Energy conversion: convert the motor energy of the vehicle into thermal energy.
3. Ensure driving safety: Provide reliable braking effects in emergency situations to ensure the safety of drivers and passengers.

Product name	front brake disc
Size	OEM Standard Size,Standard
Type	Car Body Parts
Material	Steel
Color	silver
Packing	Carton,normal
Car make	Geely Xingyue I
Quality	Genuine product,High Level
