Product Description

Geely Xingyue I right front fender assembly

Geely Xingyue L right front fender assembly has the following characteristics:

Advantages:

1. It is made of high-strength materials and has good impact resistance, which can effectively protect the body and internal components in the event of a slight collision of the vehicle.
2. After careful design, it is perfectly integrated with the overall shape of the body to improve the appearance and beauty of the vehicle.

Principle:

The main function of the fender is to prevent the sand, mud, etc. rolled up by the wheels from splashing on the bottom of the carriage, while reducing wind resistance to a certain extent.

Technology:

1. Advanced stamping technology is used to ensure the shape accuracy and surface quality of the fender.
2. Anti-rust and anti-corrosion treatment technologies may be used to extend the service life.

Workmanship:

1. The edge treatment is fine and the seams are uniform, reflecting a high level of technology.
2. The paint is smooth, the color is uniform, and the texture is good.

Features:

1. It conforms to the aerodynamic design to reduce wind noise and wind resistance.
2. The shape and body lines are smoothly connected, enhancing the overall coordination.

Function:

1. Protect the parts in the engine compartment of the vehicle from external debris.
2. It plays a role in decorating and beautifying the side appearance of the vehicle.
3. In the event of a side collision, it can absorb part of the energy and reduce the damage to the people in the car.
