

## Geely Boyue Transmission Oil Pump Unique Manufacturing Process for Optimal Performance

Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

### Basic Information

- Place of Origin: China zhejiang
- Brand Name: GEELY
- Model Number: 3055014200
- Minimum Order Quantity: 1
- Price: RMB+380+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Transmission Oil Pump/gearbox Oil Pump/transmission Fluid Pump
- Color: Silver
- Material: Steel
- Type: Car Interior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Boyue
- Size: Standard
- Highlight: **Geely Boyue Transmission Oil Pump, Optimal Performance Transmission Oil Pump, Unique Manufacturing Transmission Oil Pump**

### Geely Boyue transmission oil pump

In Geely Boyue's precision power system, the transmission oil pump is like a strong and stable heart, providing continuous power support for the smooth transmission of the vehicle. Its exquisite craftsmanship, advanced technology, reliable quality, fine workmanship, and significant advantages and key roles have jointly created Geely Boyue's excellent driving performance.

#### I. Process

The manufacturing process of Geely Boyue gearbox oil pump is unique. High-precision machining equipment and strict production processes are adopted to ensure that every component can meet the precision requirements of micron level. From the screening of raw materials to the assembly of the finished product, each process has undergone strict quality testing to ensure the performance and durability of the oil pump.

#### II. Technology

Integrating the cutting-edge technology of modern automotive engineering, Geely Boyue gearbox oil pump adopts advanced electronic control technology, which can accurately adjust the output pressure and flow of the oil pump in real time according to the driving status of the vehicle and the operator's operation intention. This intelligent control technology not only improves the response speed and accuracy of the variable speed, but also greatly reduces energy loss and improves fuel economy.

#### III. Quality

Quality is one of the core advantages of Geely Boyue gearbox oil pump. High-strength, high-temperature and corrosion-resistant high-quality materials are selected to ensure the stable operation of oil pumps in various harsh working environments. At the same time, through a strict quality control system, all-round performance tests and durability tests are carried out on each oil pump. Only products that meet high standards can leave the factory, providing users with reliable quality assurance.

#### IV. Workmanship

The details are in the true chapter. The workmanship of the Geely Boyue gearbox oil pump is fine. The surface of each part has been finely polished and treated, which not only improves the assembly accuracy of the part, but also reduces friction resistance and wear, and prolongs the service life of the oil pump. The overall structure design of the oil pump is compact and reasonable, and the wiring is neat and orderly, showing a very high level of process.

#### V. Advantages

1. High efficiency: It can quickly and stably provide sufficient hydraulic oil for the gearbox to ensure the smooth and rapid transmission process.
2. Low noise: Through optimized structural design and advanced noise reduction technology, the noise when the oil pump is working is effectively reduced, creating a quiet and comfortable driving environment for the driver.
3. High reliability: After strict testing and verification, stable performance can be maintained under various complex road conditions and use conditions, reducing the probability of failure.
4. Energy saving and environmental protection: Advanced technology and efficient design enable the oil pump to minimize energy consumption and reduce the impact on the environment when working.

#### VI. Function

1. Provide pressure: Provide the required hydraulic pressure for the clutch, brake and other components in the gearbox to realize the switching and locking of gears.
2. Lubrication and cooling: The hydraulic oil is transported to all parts of the gearbox, which plays the role of lubrication and cooling, and reduces the wear and heat accumulation of parts.
3. Ensure transmission efficiency: ensure that the transmission components inside the gearbox are always in good working condition, improve the transmission efficiency, and improve the power performance of the vehicle.

With its excellent craftsmanship, technology, quality, workmanship, advantages and important role, Geely Boyue gearbox oil pump has become a strong support for the excellent performance of Geely Boyue models. It is not only the embodiment of the technical strength of Geely Automobile, but also a reliable guarantee for a comfortable, safe and efficient driving experience for the majority of users.

Product name	transmission oil pump/gearbox oil pump/transmission fluid pump
Color	Silver
Material	steel
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car model	Geely boyue
Size	Standard
