

Geely Boyue Car Interior Parts Automatic Transmission Valve Body

Our Product Introduction

Basic Information

- Place of Origin: China zhejiang
- Brand Name: GEELY
- Model Number: 3088004100
- Minimum Order Quantity: 1
- Price: RMB+2100+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Automatic Transmission Valve Body/ Auto Transmission Valve Block
- Color: Black
- Material: High-strength Alloy And Steel
- Type: Car Inerior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Boyue
- Size: Standard
- Highlight: **Geely Boyue Car Interior Parts,
Car Interior Parts Transmission Valve,
Geely Boyue transmission valve body**

Product Description

Geely Boyue automatic transmission valve body

Geely Boyue automatic transmission valve body shows excellent quality and performance in terms of process, technology, quality, workmanship, advantages and functions.

Process:

The valve body of Geely Boyue automatic transmission adopts advanced manufacturing technology. Through high-precision machining and strict production process control, the dimensional accuracy and shape tolerance of each valve body are guaranteed to meet extremely high standards. Complex oil channels and valve holes are accurately processed to ensure the smooth flow of hydraulic oil.

Technology:

In terms of technology, the valve body integrates advanced electronic control technology and hydraulic control technology. The electronic sensor can monitor the working status of the transmission in real time and transmit the data to the control unit, so as to achieve accurate control of the valve body. Hydraulic control technology ensures the stable and rapid response of the oil pressure when shifting, making the shifting process more stable and rapid.

Quality:

Geely's strict requirements for quality run through the entire production process of the valve body. From the selection of raw materials to the testing of finished products, every link has undergone strict quality control. With high-quality alloy materials and advanced heat treatment technology, the valve body has excellent strength and wear resistance, and can maintain stable performance in long-term use.

Workmanship:

The workmanship of the valve body is fine, the surface is smooth and smooth, without any defects and burrs. The matching accuracy of the valve hole and the valve core is extremely high, which ensures the sealing and control accuracy of the hydraulic oil. The inner wall of the oil channel has been specially treated to reduce the resistance and leakage of the oil and improve the working efficiency of the transmission.

Advantages:

1. Accurate control: It can accurately control the flow direction and pressure of hydraulic oil, achieve accurate shift operation, and improve driving comfort and fuel economy.
2. Quick response: After receiving the control signal, the oil pressure can be quickly adjusted to achieve fast shifting and improve the power performance and response speed of the vehicle.
3. High reliability: After rigorous testing and verification, it has excellent reliability and durability, which reduces the failure rate and reduces maintenance costs.
4. Strong adaptability: It can adapt to different driving conditions and working conditions to ensure that the transmission can work normally in various environments.

Function:

1. Adjust the oil pressure: According to the driving status of the vehicle and the operation of the driver, control the oil pressure inside the transmission to realize the switching of different gears.
2. Oil distribution: Reasonable distribution of the flow direction of hydraulic oil, so that each clutch and brake can work accurately and complete the shift action.
3. Ensure lubrication: Provide sufficient lubrication and cooling for the components inside the transmission to extend the service life of the transmission.

With its exquisite craftsmanship, advanced technology, reliable quality, fine workmanship, significant advantages and important roles, the valve body of Geely Boyue automatic transmission provides stable, efficient and accurate control for Geely Boyue automatic transmission, and brings an excellent driving experience to the driver.

Product name	automatic transmission valve body/ auto transmission valve block
Color	Black
Material	high-strength alloy and steel
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car model	Geely Boyue
Size	Standard
