

Adjustable Geely Boyue Car Electrical Parts Electronic Control Module ABS System

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 4027007300530
- Minimum Order Quantity: 1
- Price: RMB+1620+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Electronic Stability Control Module/Abs System
- Fuel Type: Electric
- Color: Black
- Type: Car Electrical Parts
- Material: Aluminum,plastic
- Car Make: Geely Boyue
- Highlight: **Car Electrical Parts ABS system,
Car Electrical Parts Electronic Control Module,
Geely Boyue car electronic control module**

Product Description

Geely Boyue Electronic Stability Control Module

Geely Boyue electronic stability control module condenses cutting-edge technology, advanced technology, excellent quality and fine workmanship, showing many significant advantages and important roles.

In terms of technology, a highly precise manufacturing process is adopted. Through advanced integrated circuit production technology and strict packaging process, the module has excellent stability and reliability, and can work normally under various complex environmental conditions.

At the technical level, it integrates the latest vehicle dynamic control algorithm and sensor fusion technology. It can monitor the driving status of the vehicle in real time, including multiple parameters such as speed, steering angle, wheel speed, etc., and respond quickly and accurately to adjust the braking and power output of the vehicle.

Quality control is extremely strict. From the selection of parts to the testing of finished products, strict quality standards are followed. Each electronic stability control module has undergone long-term durability tests, high temperature and high humidity environment tests, etc. to ensure its long-term stable operation.

The workmanship is fine, the circuit board layout is reasonable, and the line connection is close and regular. High-quality electronic components are used to ensure the stability and accuracy of signal transmission and reduce the possibility of failure. It has significant advantages, which can effectively improve the stability and maneuverability of the vehicle in an emergency, and prevent the occurrence of dangerous situations such as side slipping and tail shaking. In complex road conditions such as slippery roads and sharp turns, it provides more reliable safety and security for drivers.

The role is crucial. The Geely Boyue electronic stability control module continuously monitors and adjusts the dynamics of the vehicle in the process of vehicle driving, so as to keep the vehicle's driving trajectory in line with the driver's expectations. It can automatically intervene in the braking system and engine power output at critical moments, helping the driver control the vehicle steadily, reducing the risk of accidents, and greatly improving the safety and comfort of driving.

In a word, Geely Boyue electronic stability control module brings drivers a more reassuring, stable and comfortable driving experience with its exquisite technology, advanced technology, reliable quality, fine workmanship, obvious advantages and key role

Product name	Electronic Stability Control Module/Abs system
Fuel type	Electric
Color	Black
Type	Car Electrical Parts
Material	Aluminum,plastic
car make	Geely Boyue
