

## ODM Geely Boyue Plastic Car Front Subframe Fine Surface Treatment Process

Our Product Introduction

### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 4086035100
- Minimum Order Quantity: 1
- Price: RMB+1000+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Front Subframe
- Size: Standard
- Type: Car Body Parts
- Material: Plastic
- Color: Black
- Packing: Carton,normal
- Car Make: Geely Boyue
- Quality: Genuine Product,High Level
- Highlight: **ODM car front subframe,**  
**Plastic car front subframe,**  
**ODM front subframe car**

## Product Description

### Geely Boyue front subframe

As a high-profile car, Geely Boyue's front secondary frame shows excellent technology, advanced technology, reliable quality and excellent workmanship.

#### Process:

The front subframe of Geely Boyue adopts high-precision stamping and welding technology to ensure the close connection and accurate cooperation between various components. Each weld has been strictly tested and optimized to improve the overall strength and durability. At the same time, the surface treatment process is also very fine, which effectively prevents corrosion and wear, so that the front subframe can maintain good performance in various harsh environments.

#### Technology:

In terms of technology, Geely Boyue's former sub-frame incorporates advanced design concepts. Through computer-aided engineering (CAE) analysis, the structure has been optimized, and the perfect combination of lightweight and high strength has been achieved. In addition, advanced suspension connection technology is adopted, so that the front suspension system can transmit power more effectively and improve the handling stability and comfort of the vehicle.

#### Quality:

Geely has extremely strict quality control over the front sub-frame. From the selection of raw materials to the monitoring of the production process, every link follows a high-standard quality system. The selection of high-strength steel and strict quality inspection ensure that the front sub-frame has excellent fatigue and impact resistance, providing a solid guarantee for the long-term stable operation of the vehicle.

#### Workmanship:

The details can be seen in the true chapter. The workmanship of Geely Boyue's former sub-frame is first-class. The machining accuracy of each part has reached a very high level, the edges are smooth and burr-free, and the surface is flat and flawless. The installation hole position is accurate, ensuring seamless docking with other components, reflecting Geely's persistent pursuit of quality.

#### Advantages:

- 1. Enhance body rigidity:** The front and sub-frame of Geely Boyue effectively enhances the structural rigidity of the front of the body, which can better resist the impact and distortion from the road during driving, and improves the overall safety of the vehicle.
- 2. Optimize suspension performance:** It provides a stable support foundation for the suspension system, so that the suspension can work more accurately, thus improving the handling performance and riding comfort of the vehicle.
- 3. Reduce noise and vibration:** Good design and manufacturing process effectively reduces the noise and vibration transmitted from the front subframe to the car, creating a quiet and comfortable driving environment for drivers and passengers.

#### Function:

- 1. Load-bearing engine and transmission:** The front sub-frame of Geely Boyue bears the weight of the engine and transmission to ensure its stability and reliability during operation.
- 2. Transmission of driving force and braking force:** effectively transmit the driving force of the engine and the braking force of the braking system to the wheels to ensure the normal driving and braking performance of the vehicle.
- 3. Protect chassis parts:** In case of collision or scratch, the front subframe can play a certain protective role and reduce damage to other important parts of the chassis.

In a word, with its exquisite craftsmanship, leading technology, reliable quality, excellent workmanship, and significant advantages and important role, Geely Boyue's predecessor sub-frame has become a highlight of Geely Boyue models, bringing users a more excellent driving experience.

Product name	front subframe
Size	Standard
Type	Car Body Parts
Material	Plastic
Packing	Carton,normal
Color	Black
Car make	Geely Boyue
Quality	Genuine product,High Level
