

Custom Geely Boyue Constant Speed Automobile Drive Shaft Car Parts

Our Product Introduction

for more products please visit us on auto-partsspare.com

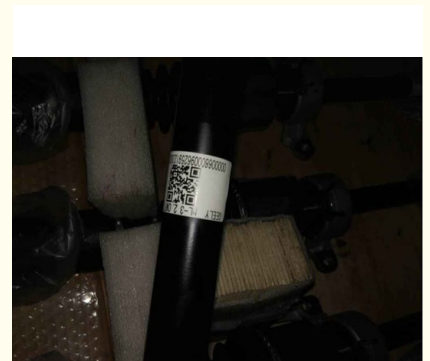

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 4082037900
- Minimum Order Quantity: 1
- Price: RMB+460+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Right Front Constant Speed Drive Shaft Assembly
- Color: Black
- Material: Aluminum Alloy
- Type: Car Interior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Boyue
- Size: Standard
- Highlight: Custom automobile drive shaft,
Geely Boyue automobile drive shaft,
Geely Boyue car drive shaft parts

Product Description

Geely Boyue right front constant speed drive shaft assembly

Geely Boyue right front constant speed drive shaft assembly shows unparalleled advantages and important role with its exquisite technology, advanced technology, excellent quality and fine workmanship.

Process:

Geely Boyue right front constant speed drive shaft assembly adopts a modern precision manufacturing process. The forging process of the shaft rod ensures the high strength and uniformity of the material, while the processing of the spline achieves accurate tooth shape and matching tolerance through high-precision numerical control equipment. The assembly process of the assembly strictly follows the standardized process, and each step is carefully debugged and tested to ensure the overall performance and reliability of the drive shaft.

Technology:

In terms of technological innovation, Geely Boyue right front constant speed drive shaft assembly integrates a number of cutting-edge technologies. Advanced sealing technology is adopted to effectively prevent the leakage of lubricating oil and the invasion of external impurities, and prolong the service life of the drive shaft. The design of the constant speed universal joint is more exquisite. It can maintain a constant transmission speed no matter how the steering angle changes during the vehicle's driving, which greatly improves the stability and comfort of driving.

Quality:

Geely's pursuit of quality has never been relaxed, and the right front constant speed drive shaft assembly is no exception. Starting from the screening of raw materials, only high-quality steel that meets high standards is selected. In the production process, a strict quality inspection system is introduced to strictly test each key size and performance index to ensure that each drive shaft can meet or even exceed the design requirements.

Workmanship:

The meticulous workmanship is a major feature of Geely Boyue's right front constant speed drive shaft assembly. The surface treatment is smooth and smooth, which is not only beautiful, but also reduces friction resistance. The connection between the parts is tight and seamless, and each solder joint and screw joint have been carefully processed, showing a very high level of technology.

Advantages:

1. Efficient transmission: It can efficiently and smoothly transmit the power of the engine to the right front wheel, reducing energy loss and improving fuel economy.
2. Adapt to complex road conditions: Excellent design and manufacturing enable the drive shaft to easily cope with various complex road conditions and driving conditions, such as rapid acceleration, sharp turns, etc., and maintain stable and reliable transmission performance.
3. Low noise operation: precision processing and high-quality materials effectively reduce the noise and vibration generated by the drive shaft at work, and create a quiet and comfortable environment for the car.

Function:

1. Power transmission: As a key component of power transmission, the power of the engine is transmitted to the right front wheel to drive the vehicle forward.
2. Steering coordination: When the vehicle is steering, coordinate the rotation angle and speed of the right front wheel to ensure the accuracy and flexibility of steering.
3. Cushion shock absorption: absorb the impact and vibration from the road surface, reduce damage to other parts of the vehicle, and improve the durability of the vehicle.

Geely Boyue right front constant speed drive shaft assembly, with its excellent process, technology, quality, workmanship, advantages and function, brings a safe, comfortable and efficient driving experience to the driver, which is a strong support for Geely Boyue's excellent performance.

Product name	right front constant speed drive shaft assembly
Color	Black
Material	Aluminum Alloy
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car model	Geely Boyue
Size	Standard
