

## Geely Boyue Integrated Internal Car Rearview Mirror Electronic Custom

Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

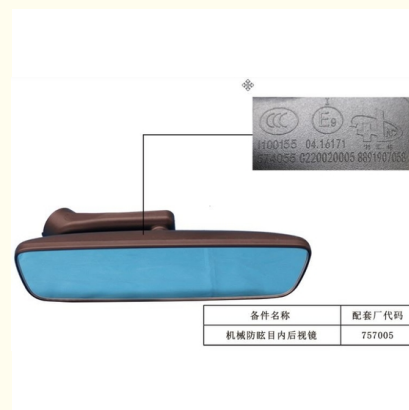

### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 6015069800
- Minimum Order Quantity: 1
- Price: RMB+65+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Internal Rearview Mirror
- Color: Black
- Material: Plastic
- Type: Car Interior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Boyue
- Size: Standard
- Highlight: **Electronic car rearview mirror, Integrated car rearview mirror, custom rear view mirror Electronic**

## Product Description

### Geely Boyue internal rearview mirror

Geely Boyue's internal rearview mirror has excellent performance in technology, technology, quality, workmanship and other aspects:

In terms of technology, its manufacturing process is exquisite and pays attention to details. For example, the mirror is specially treated and has a clear imaging effect, which can accurately reflect the situation in the rear.

In terms of technology, it may be equipped with some advanced functions. For example, anti-glare technology can effectively reduce the interference of the strong light of the rear vehicle on the driver's line of sight and improve driving safety; the internal rearview mirror of some models may also integrate other electronic functions, such as compass, driving recorder, etc.

In terms of quality, it has undergone strict quality testing to ensure that it is strong and durable and can maintain stable performance in various operating environments.

The workmanship is fine, the installation is stable, and it is in harmony with the overall style of the car.

Its advantages and functions mainly include:

- Provide a clear rear view: allowing the driver to accurately understand the traffic conditions behind the vehicle, which is essential for lane change, reversing, overtaking and other operations.
- Accurately judge the distance: Because the inner rearview mirror is a flat mirror, which can reflect the real distance, the driver can more accurately judge the distance from the rear car, especially when driving at high speed, which helps to ensure driving safety. For example, when you happen to see the front wheels of the rear car in the rearview mirror, the distance between the front and rear cars is about 13 meters; when you see the net, it is about 6 meters; when you see the upper edge of the rear bumper of the front car, it is about 1 meter.
- It is convenient to observe the situation in the car, such as the status of the passengers in the back row.

In order to ensure the best effect of the internal rearview mirror, it is recommended to correctly adjust the angle of the internal rearview mirror. Generally speaking, the horizon image in the central rearview mirror should be adjusted to the center of the mirror, and the image of the right ear should be adjusted to the left edge of the mirror. This can gain good vision during driving and improve the safety and comfort of driving. At the same time, pay attention to keep the inner rearview mirror clean to ensure clear imaging. If the inner rearview mirror is faulty or damaged, it should be repaired or replaced in time.

Product name	internal rearview mirror
Color	Black
Material	plastic
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car model	Geely Boyue
Size	Standard
