Product Description

Geely Boyue external rearview mirror

Geely Boyue's external rearview mirror has excellent performance in technology, quality, workmanship and other aspects, and has the following advantages and functions:

In terms of craftsmanship:

- The manufacturing process is exquisite, attention is paid to details, and the appearance is exquisite, which is coordinated with the overall style of the body.

Technical aspects:

- Some models are equipped with automatic folding function. Through induction technology and electronic control, it will automatically expand when the speed exceeds a certain value, and automatically fold when the speed slows down or stops. For example, in the 2020 Geely Boyue, when the external rearview mirror folding switch is in a non-folding position and the external rearview mirror is in a folded state, the external rearview mirror will automatically turn on after the whole car is unlocked or the power is switched to the ignition gear; when the external rearview mirror folding switch is in the non-folding gear and the external rearview mirror is in the unfolded state. At that time, the external rearview mirror of the whole vehicle is automatically folded.
- It is possible to use double curvature lens or multi-curvature lens technology to increase the visual area, provide a larger viewing angle, reduce the blind area of the field of vision, and help improve driving safety. For example, the double curvature external rearview mirror equipped by the 2018 Boyue has a visual field of view about twice as much as it meets the condition of basic use without distortion and dizziness.

Quality aspects:

- After strict quality testing, it is ensured that it is strong and durable, can adapt to various use environments, and maintain stable performance for a long time.

Workmanship:

- The installation is stable, easy to adjust, and can accurately reflect the situation outside the car.

Advantages and functions:

- It provides a clear side and rear view to help the driver observe the traffic conditions on both sides and rear of the vehicle, and facilitates lane change, overtaking, reversing and other operations.
- The automatic folding function can prevent the rearview mirror from being hit by other vehicles or obstacles when parking, and protect the rearview mirror from damage.
- The locking automatic folding rearview mirror is not only convenient, but also improves the overall beauty and sense of technology of the vehicle.
- Some external rearview mirrors also have a heating function, which can quickly remove water vapor from the mirror under rain, snow, fog and other weather conditions to keep the mirror clear and ensure that the driver's vision is not affected.

Product name	external rearview mirror/side mirror/wing mirror/door mirror
Size	OEM Standard Size,Standard
Type	Car Body Parts
Material	Plastic and glass
Color	Black
Packing	Carton,normal
