

7010005700 Car Electrical Parts Geely Boyue Custom Engine Wiring Harness

Our Product Introduction

for more products please visit us on auto-partsspare.com

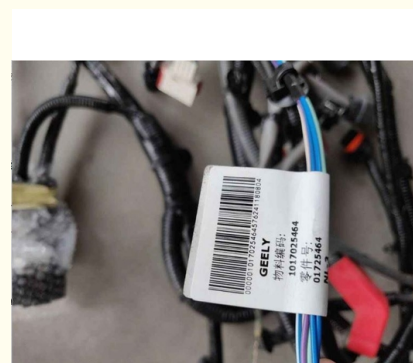

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 7010005700
- Minimum Order Quantity: 5
- Price: RMB+1100+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Engine Wiring Harness/motor Wiring Harness/engine Wire Harness
- Fuel Type: Electric
- Color: Black
- Type: Car Electrical Parts
- Material: Plastic
- Car Make: Geely Boyue
- Highlight: **custom Car Electrical Parts, Car Electrical Parts Engine Harness, custom engine wiring harness Electrical Parts**

Product Description

Geely Boyue engine wiring harness

Geely Boyue engine wiring harness has significant advantages and plays an important role in technology, technology, quality, workmanship and other aspects.

In terms of craftsmanship:

A high-precision manufacturing process is adopted to ensure that the size of the wire harness is accurate and the lines are tightly connected and stable. The interior is composed of multiple strands of soft copper wire, and the exterior is protected by plastic materials, which has good wear resistance and corrosion resistance.

Technical aspects:

Use advanced technology to optimize the design of the wire harness to adapt to the complex working environment of the engine. Special shielding technology may be used to effectively reduce electromagnetic interference and ensure the accuracy and stability of signal transmission.

Quality aspects:

High-quality materials are strictly selected, and after multiple quality tests, it has excellent high temperature resistance and low temperature resistance. It can maintain good performance under various harsh conditions. It is not easy to age and damage, and ensure long-term reliable operation.

Workmanship:

The details are finely processed, the line layout is reasonable, neat and orderly, and the wiring harness is firmly and reliable, which effectively avoids problems such as loose lines and short circuits.

Advantages:

1. Accurate signal transmission: ensure that the signal transmission between each sensor and the control unit of the engine is accurate, so that the engine can accurately control various operations.
2. Stable power supply: Provide stable power for the electrical components of the engine to ensure the normal operation of the engine.
3. Good anti-interference: reduce the interference of external factors to the signal, and improve the control accuracy and working stability of the engine.
4. Strong durability: high-quality materials and exquisite craftsmanship extend the service life of the wire harness and reduce the risk of failure.

Function:

1. Like the "neural network" of the engine, it connects various sensors, controllers and actuators on the engine to realize data exchange and communication between them, so as to monitor and accurately control the running status of the engine in real time. For example, monitor the speed, temperature, oil pressure and other parameters of the engine, and provide the engine with ignition, fuel injection, idle speed and other control signals according to these parameters.
2. Ensure the performance and safety of the engine. If the wiring harness fails, it may lead to problems such as unstable engine operation, increased fuel consumption and even damage, and Geely Boyue's engine wiring harness can effectively avoid these situations.

Product name	engine wiring harness/motor wiring harness/engine wire harness
Fuel type	Electric
Color	Black
Type	Car Electrical Parts
Material	plastic
car make	Geely Boyue
