Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 7082002100
- Minimum Order Quantity: 1000
- Price: RMB+14+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

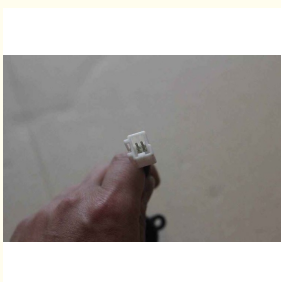

Product Specification

- Product Name: High Sound Speaker
- Fuel Type: Electric
- Color: Black,White
- Type: Car Electrical Parts
- Material: Plastic
- Car Make: Geely Boyue
- Highlight: aftermarket car sound system Electrical Parts,
Geely aftermarket car sound system,
Geely car audio loudspeakers

Product Description

Geely Bo's high sound speaker

In the audio system carefully built by Geely Boyue, the tweeter is undoubtedly a bright pearl. With its exquisite technology, advanced technology, excellent quality and fine workmanship, it brings unparalleled auditory enjoyment to drivers and passengers.

Process:

Geely Bo's high-peak speaker adopts a high-precision manufacturing process, and every detail has been carefully carved. From the material selection of the shell to the assembly of internal components, it all reflects the persistent pursuit of quality. High-quality metal or high-strength plastic materials not only give the speaker strong and durable characteristics, but also effectively reduce resonance and noise, and ensure the purity and clarity of the sound.

Technology:

Combining the latest acoustic technology, Geely Bo's higher audio speaker can accurately control the frequency and directivity of the sound. It adopts advanced treble unit design, such as silk membrane treble or titanium membrane treble, which can show a delicate and transparent treble effect and easily break through the limits of human ear hearing. At the same time, through the optimized frequency separation technology, it achieves a seamless connection with the mid-woofer, creating a well-structured, wide and full sound field.

Quality:

Strict quality control is one of the core advantages of Geely's high-peak speaker. In the production process, each speaker has to go through multiple strict testing processes, including acoustic performance test, durability test and environmental adaptability test. Only through these harsh tests can it be installed on Geely Boyue's car to provide users with long-term stable high-quality sound effects.

Workmanship:

Its workmanship is exquisite, and both the appearance of the speaker and the internal structure show a very high level of craftsmanship. The smooth shell design is not only beautiful and generous, but also effectively reduces wind noise and airflow interference. The internal wiring is neat and orderly, and the solder joints are firm and reliable, which ensures the stability and efficiency of signal transmission.

Advantages:

1. Excellent high-frequency response: It can clearly present the treble details in the music, such as the overtone of the instrument and the treble part of the vocal, making the music more vivid and realistic.
2. Wide directivity: so that the sound can be evenly distributed in the space of the car, and you can enjoy the same excellent treble effect no matter where you sit.
3. Low distortion: It ensures the original taste of the sound, and will not affect the quality and listening experience of the music because of distortion.

Function:

Geely Bo's high sound speaker plays a vital role in the whole sound system. It can improve the clarity and brightness of the music and add a sense of hierarchy and space to the whole sound field. Whether listening to exciting rock music, melodious classical music or touching pop songs, the tweeter can bring you an immersive listening feast, making every driving journey a musical carnival.

Product name	high sound speaker
Fuel type	Electric
Color	Black,White
Type	Car Electrical Parts
