

Geely Boyue Wireless Car Engine Control Module ECM Vehicle Mounted

Our Product Introduction

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 7094005200
- Minimum Order Quantity: 5
- Price: RMB+1724+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Vehicle-mounted Wireless Control Module
- Fuel Type: Electric
- Color: Black
- Type: Car Electrical Parts
- Material: #1Steel,Aluminum,plastic
- Car Make: Geely Boyue
- Highlight: Geely Boyue car engine control module,
ECM car engine control module,
Geely Boyue car control module

Product Description

Geely Boyue vehicle-mounted wireless control module

Geely Boyue on-board wireless control module, as the core component of the vehicle intelligent system, brings unprecedented convenience and comfort to drivers with its exquisite technology, advanced technology, excellent quality and fine workmanship.

Craft: fine carving, quality selection

Each Geely Boyue on-board wireless control module has undergone a strict production process. From the screening of raw materials to the assembly of parts, every process strives for excellence. High-precision molds and advanced manufacturing equipment are used to ensure that the dimensional accuracy and appearance of the module reach the industry-leading level. The surface treatment process is unique. After multiple polishing and painting processes, the module has excellent corrosion resistance and wear resistance, and can maintain a good appearance and performance even in harsh environments.

Technology: Leading the trend, intelligent interconnection

This module integrates the most advanced wireless communication technology today, supports a variety of frequency bands and protocols, and can seamlessly connect with other systems in the vehicle. Efficient signal processing algorithm is adopted to ensure the stable transmission and rapid response of wireless signals. At the same time, it has strong anti-interference ability and can work normally in a complex electromagnetic environment. By connecting with mobile devices such as smartphones, drivers can easily control the vehicle remotely, check the status of the vehicle and other functions, so that you can control your car anytime and anywhere.

Quality: strict control, reliable guarantee

Quality is the lifeline of Geely Boyue's on-board wireless control module. In the production process, we strictly follow international quality management standards and strictly test and monitor every link. From the purchase inspection of parts to the factory testing of finished products, every step is meticulous. Advanced testing equipment and means are used to comprehensively test the electrical performance, mechanical performance and environmental adaptability of the module to ensure that each module meets the high-quality standards. In addition, a large number of reliability tests have been carried out to simulate various extreme working conditions, verify the stability and durability of the module, and provide a reliable guarantee for your driving safety.

Workmanship: fine and meticulous, ingenuity

The workmanship of Geely Boyue's on-board wireless control module is excellent. The internal line layout is reasonable and orderly, which reduces the possibility of signal interference and failure. The assembly between the parts is tight and seamless, showing a high level of craftsmanship. The interface is gold-plated, which improves the contact performance and signal transmission quality. Every detail has been carefully carved to reflect Geely's persistent pursuit of quality.

Advantages: beyond expectations, unique

1. Convenience: The wireless connection between the vehicle and external equipment can be realized without tedious wiring, which greatly simplifies the installation and maintenance process.
2. Intelligent: It can automatically adjust the vehicle settings according to the driver's habits and needs to provide a personalized driving experience.
3. Security: Use encryption technology to ensure the security of wireless communication and prevent illegal intrusion and data leakage.
4. Compatibility: It supports a variety of models and equipment and has a wide range of applicability.

Function: Improve the driving experience and enjoy intelligent travel

The role of Geely Boyue on-board wireless control module is not only to realize the wireless control of the vehicle, but also to improve the driving experience. It allows you to focus more on the road during driving, and easily operate various functions of the vehicle through voice control, such as adjusting the temperature of the air conditioner, switching music, navigation, etc. At the same time, it can also monitor the status of the vehicle in real time, such as tire pressure, fuel consumption, fault information, etc., so that you can know the situation of your car. In addition, the module also supports remote diagnosis and upgrade of vehicles to keep your vehicle in the best condition.

In a word, Geely Boyue vehicle wireless control module has become a highlight of Geely Boyue model with its excellent technology, advanced technology, reliable quality, fine workmanship, unique advantages and important role. Choosing Geely Boyue is to choose an intelligent, convenient and safe way of travel to make your driving journey more exciting!

Product name	vehicle-mounted wireless control module
Fuel type	Electric
Color	Black
Type	Car Electrical Parts
Material	#1Steel,Aluminum,plastic
car make	Geely Boyue
