

## Geely Boyue Auto Car Electrical Parts Keyless Entry And Start Control Module

Our Product Introduction

for more products please visit us on auto-partsspare.com

### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 7092021100
- Minimum Order Quantity: 10
- Price: RMB+611+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Keyless Entry And Start Control Module
- Fuel Type: Electric
- Color: Black
- Type: Car Electrical Parts
- Material: Plastic
- Car Make: Geely Boyue
- Highlight: Car Electrical Parts Keyless Entry, Car Electrical Parts Start Control Module, Geely Boyue auto start module

## Product Description

### Geely Boyue keyless entry and start control module

As a high-profile car, its keyless entry and start control module brings drivers a convenient, safe and comfortable driving experience with exquisite craftsmanship, leading technology, excellent quality and fine workmanship.

#### Process:

Geely Boyue's keyless entry and start control module adopts advanced manufacturing technology, and each component has been strictly screened and processed. The shell of the module is made of high-strength engineering plastic, has good wear resistance and impact resistance, and can work stably in various harsh environments. The internal circuit adopts high-precision printed circuit board (PCB) manufacturing technology to ensure the stability and reliability of signal transmission.

#### Technology:

The control module integrates the latest radio frequency identification (RFID) technology and encryption algorithms. When the driver brings a legal key close to the vehicle, the module will automatically sense and recognize the key signal to achieve keyless entry. When starting the vehicle, the module will encrypt and communicate with the engine control unit. Only the verified key can start the engine, which effectively prevents the vehicle from being stolen. In addition, the module also has intelligent power management technology, which can automatically adjust the power consumption according to the use status of the vehicle and extend the battery life.

#### Quality:

Geely Boyue is extremely strict in the quality control of the keyless entry and start control module. In the production process, each module has to go through multiple quality testing processes, including functional testing, performance testing, environmental adaptability testing, etc. Only all the tested modules can be installed on the vehicle, ensuring that every Geely Boyue has reliable keyless entry and start functions.

#### Workmanship:

The workmanship of the module is exquisite, and each interface and button have been carefully designed and polished, and the operation feels comfortable and smooth. The internal wiring is neat and orderly, and the connection between the various parts is firm and reliable, which fully reflects Geely Automobile's attention to details and pursuit.

#### Advantages:

1. Convenience: Drivers no longer need to use traditional keys to unlock and start. They only need to carry the key on their bodies to easily enter and start the vehicle, which greatly improves the convenience of use.
2. Security: Advanced encryption technology effectively prevents the copying and embezzlement of illegal keys and ensures the safety of vehicles.
3. Comfort: The keyless entry and start functions avoid the embarrassment of looking for keys in cold or bad weather, and provide a more comfortable driving environment for drivers.
4. Intelligence: The module can intelligently interact with other systems of the vehicle, such as automatically adjusting seats, rearview mirrors, etc., which improves the intelligent level of the vehicle.

#### Function:

Geely Boyue keyless entry and start control module is not only a convenient function, but also an important part of improving the overall quality and user experience of the vehicle. It makes it easier for the driver to enter and start the vehicle, and also adds a lot of points to the safety and intelligence of the vehicle. Whether it is daily commuting or long-distance travel, this small control module can bring you intimate service and guarantee.

Product name	keyless entry and start control module
Fuel type	Electric
Color	Black
Type	Car Electrical Parts
Material	plastic
car make	Geely Boyue
