

Secondary Dashboard Front Ventilation Car Automotive Air Intake Hose Geely Boyue

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 8028003300
- Minimum Order Quantity: 50
- Price: RMB+130+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Front Ventilation Pipe Of Geely Boyue
Secondary Dashboard
- Color: Black
- Application: Exhaust Wind
- Package: Cartoon
- Quality: Excellent Quality
- Car Make: Geely Boyue
- Highlight: **Front Ventilation automotive air intake hose,
Geely automotive air intake hose,
Front Ventilation car intake hose**

Product Description

Front ventilation pipe of Geely Boyue secondary dashboard

The front ventilation pipe of Geely Boyue's secondary dashboard has the following characteristics:

Process and technology:

- Advanced manufacturing processes may be used to ensure the dimensional accuracy and tight connection of the ventilation pipes. For example, through reasonable mold design and injection molding process, the shape and structure of the ventilation pipe meet the design requirements.
- Perhaps the optimized air duct design technology is used to achieve smoother air flow and reduce wind resistance and noise.

Quality:

- After strict quality testing, including testing of material durability, sealing and other aspects, to ensure stability and reliability in long-term use.
- The selected material may have good heat resistance, cold resistance and anti-aging performance, and adapt to different internal environmental conditions.

Workmanship:

- It has fine workmanship, and all connecting parts are handled properly to ensure the sealing of the air duct and avoid air leakage.
- The surface is smooth, there are no obvious flaws or burrs, and does not affect the air flow.

Advantages:

- Effectively guide the cold or hot air generated by the air conditioning system to the desired location to provide a comfortable temperature environment for the car.
- Reasonable air duct design can make the air distribution more uniform and improve the comfort of passengers.
- Certain insulation measures may be adopted to reduce the energy loss of hot and cold air in the air duct and help improve the efficiency of the air conditioning system.
- Installation and maintenance are relatively convenient for repair or replacement when needed.

Function:

- The main function of the front ventilation pipe of the auxiliary dashboard of Geely Boyue is to serve as a channel for air transmission, transporting the air generated by the air conditioning system to the air outlet in front of the secondary dashboard, thus adjusting the temperature and air circulation in the local area of the car. It plays a key role in the air conditioning system of the car, ensuring that drivers and passengers can obtain a suitable air environment and improve the comfort of driving and riding. At the same time, a good ventilation pipe design also helps to maintain the air quality in the car and reduce the accumulation of odor and moisture.

product name	Front ventilation pipe of Geely Boyue secondary dashboard
color	black
application	exhaust wind
package	cartoon
quality	excellent quality
car make	Geely Boyue
