

## Left Suspension Stabilizer Bar Bracket Precision Casting Machining For Geely Geometry A

Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 1079004200
- Minimum Order Quantity: 50
- Price: RMB+55+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Left Suspension Bracket/left Suspension Support/Left Suspension Component
- Color: Silver
- Material: Steel
- Type: Car Inerior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Geometry A
- Highlight: **Geely suspension stabilizer bar bracket, Precision Casting suspension stabilizer bar bracket, Precision Casting suspension bracket car**

## Product Description

### Geely geometry A left suspension bracket

#### Process:

The manufacture of Geely Geometry A left suspension bracket adopts precision casting technology and advanced machining technology. The shape and dimensional accuracy of the bracket are ensured through carefully designed molds. In the machining process, high-precision equipment is used to finely process the key parts to make the surface of the bracket smooth and flawless.

#### Technology:

- The optimized structural design technology of high-strength materials is adopted to effectively improve the bearing capacity and fatigue resistance of the bracket.
- The finite element analysis technology is used to simulate the force of the bracket under various working conditions, so as to further optimize its structure and ensure its stability and reliability.

#### Quality:

- Following a strict quality control system, every process from the selection of raw materials to the production process is strictly tested and monitored.
- Advanced testing equipment is used to accurately measure the hardness, strength, size and other key indicators of the bracket to ensure that the product quality meets high standards.

#### Workmanship:

- The welding part is firm and beautiful, the weld seam is uniform, and there are no pores, slag and other defects.
- The surface treatment is fine, and after anti-rust and anti-corrosion treatment, the service life of the bracket is improved.

#### Advantages:

- It has an excellent shock absorption effect, which can effectively reduce the vibration transmission of the vehicle during driving and improve driving comfort.
- Accurate installation and positioning design, convenient installation and maintenance, and improve work efficiency.
- The lightweight design reduces the body weight without affecting the strength and helps to improve the energy efficiency of the vehicle.

#### Function:

- The main function is to support and fix the powertrain components such as the engine and transmission, and reduce their shaking and displacement in the operation of the vehicle.
- It effectively isolates the vibration and noise of the engine and provides a quiet and comfortable environment for the car.
- Ensure the stability of the connection between the power system and the body, and ensure the handling performance and driving safety of the vehicle.

In a word, the left suspension bracket of Geely Geometry A provides a strong guarantee for the stable operation and comfortable driving of Geely Geometry A with its exquisite technology, advanced technology, reliable quality, fine workmanship, significant advantages and important roles.

Product name	left suspension bracket/left suspension support/Left suspension component
Color	Silver
Material	steel
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car model	Geely geometry A
