

Geely Geometry A Automotive Expansion Tank Assembly High Precision Molding

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 1016010920
- Minimum Order Quantity: 50
- Price: RMB+50+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Expansion Tank Assembly/Expansion Tank Set/Expansion Cistern Assembly
- Color: White
- Material: Plastic
- Type: Car Inerior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Geometry A
- Size: Standard
- Highlight: **automotive expansion tank Assembly, precision molding automotive expansion tank, Geely Geometry auto expansion tank**

Product Description

Geely Geometry A Expansion Tank Assembly

Geely Geometry A expansion tank assembly, as an important part of the vehicle cooling system, provides strong support for the stable operation and efficient performance of the vehicle with its exquisite technology, advanced technology, excellent quality, fine workmanship, significant advantages and important roles.

Technology

In terms of process, the Geely Geometry A expansion tank assembly adopts high-precision molds and advanced injection molding technology to ensure the dimensional accuracy and surface finish of the tank. Every detail has been carefully designed and strictly controlled. From the molding of the tank to the processing of the interface, it shows Geely Automobile's ultimate pursuit of technology.

Technique

Using advanced pressure control technology, it can automatically adjust the liquid level and pressure in the tank according to the temperature and pressure changes of the cooling system to ensure the stable operation of the system. At the same time, new materials and anti-corrosion treatment technology are used to effectively extend the service life of the expansion tank.

Mass

Geely Geometry A expansion tank assembly strictly follows international standards and industry norms in terms of quality. From the procurement of raw materials to the monitoring of the production process, to the inspection of finished products, every link has a strict quality inspection procedure. It ensures that each expansion tank has excellent compression resistance, sealing performance and corrosion resistance, and can work stably in various harsh environments.

Do manual work

In terms of workmanship, pay attention to details and overall coordination. The welding process of the tank is exquisite, the welding seam is uniform and firm, and there is no hidden danger of leakage. The interface has high processing accuracy and tight installation, which ensures a good connection with other components of the cooling system. The exterior design is simple and generous, and the lines are smooth, which is not only practical, but also integrated with the overall style of the vehicle.

Advantage

1. High performance: It can quickly respond to the pressure and temperature changes of the cooling system, effectively balance the system pressure, and improve the cooling efficiency.
2. Strong reliability: After rigorous testing and verification, it has excellent durability and stability, which reduces the possibility of failure.
3. Easy to maintain: reasonable design, easy to inspect and repair, and reduce maintenance costs and time.
4. Environmental protection and energy saving: Optimized structure and material selection can help reduce energy consumption and environmental impact.

Effect

The main function of Geely Geometry A expansion tank assembly is to accommodate the coolant that expands due to temperature increase in the cooling system, and to supplement the part reduced by evaporation and leakage of coolant. It can alleviate the pressure fluctuations in the cooling system, prevent the cooling system from being damaged by high pressure, and ensure the normal cooling of key components such as the engine, thus improving the reliability and durability of the vehicle.

Product name	Expansion Tank Assembly/Expansion Tank Set/Expansion Cistern Assembly
Color	white
Material	plastic
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car model	Geely Geometry A
Size	Standard
