

Aluminium Electric Car EV Battery Tray For Geely Geometry A

Our Product Introduction

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 2012514400
- Minimum Order Quantity: 1
- Price: RMB+7428+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Battery Pack Under Tray
- Color: Silver
- Material: Aluminum Alloy
- Type: Car Inerior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Geometry A
- Size: Standard
- Highlight: **Geometry A ev battery tray ,
Geely ev battery tray ,
Geely electric car battery tray**

Geely Geometry A Battery Pack Under Tray

Geely Geometry A Battery Pack Under Tray: The Integration of Excellent Technology and Innovative Technology

In the advanced electric technology system of Geely Geometry A, the tray under the battery package is undoubtedly a key component, which carries the important mission of ensuring battery safety and optimizing vehicle performance.

Exquisite craftsmanship:

The tray uses Geely Geometry A battery package adopts high-precision stamping technology and advanced welding technology. The well-designed stamping mold ensures that the shape and size of the tray are accurate, and the surface is smooth and flat without any defects. The high-quality welding process firmly connects the components together to form a solid whole, which can withstand all kinds of vibrations and shocks during the driving of the vehicle.

Leading technology:

The tray uses lightweight materials and innovative structural design. The selection of high-strength aluminum alloy material not only reduces the overall weight, but also effectively improves the strength and stiffness of the tray. The unique honeycomb structure design further enhances the pressure resistance of the tray, and optimizes the heat dissipation effect of the battery pack to ensure that the battery operates within the best operating temperature range and extends the service life of the battery.

Reliable quality:

During the production process, the tray under each Geely Geometry A battery pack has undergone strict quality inspection. From the screening of raw materials to the inspection of finished products, every process follows a high-standard quality control system. Through advanced testing equipment and professional inspectors, all-round testing of pallet dimensional accuracy, welding strength, surface treatment, etc. is carried out to ensure that each pallet meets strict quality requirements and provides users with reliable protection.

Fine workmanship:

The surface treatment of the tray is fine and fine. After multiple processes of polishing and painting, it not only has good anti-corrosion performance, but also shows an exquisite appearance. The details are in the true chapter. Every corner and interface is handled perfectly, reflecting Geely's unremitting pursuit of quality.

Significant advantages:

The advantages of the tray under the Geely Geometry A battery package are not only reflected in its own performance, but also play an important role in improving the performance of the whole vehicle. First of all, its excellent protection performance can effectively prevent the battery from being collided and damaged by the outside world and improve the safety of the vehicle. Secondly, the lightweight design reduces the overall weight of the vehicle, which helps to improve the range and energy efficiency. In addition, the good heat dissipation effect ensures the stable performance of the battery, reduces the battery failure caused by high temperature, and further improves the reliability of the vehicle.

Key to the role:

The tray under the battery bag is an important support and protection part of the battery, and its role cannot be underestimated. It can stably carry the battery pack, reduce the shaking and displacement of the battery during the driving of the vehicle, and ensure the reliable connection between the battery and the vehicle. At the same time, the tray can also effectively isolate the battery from the external environment, prevent water, dust and other impurities from entering the battery pack, and affect the normal operation of the battery. When a vehicle collides, the tray can absorb and disperse the collision energy, protect the battery from serious damage, and reduce safety risks.

To sum up, with its exquisite craftsmanship, leading technology, reliable quality, fine workmanship, significant advantages and key role, Geely Geometry A battery package tray has become a highlight of Geely Geometry A electric technology, bringing users a safer, more reliable and efficient travel experience.

Product name	Battery Pack Under Tray
Color	Silver
Material	Aluminum Alloy
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car model	Geely Geometry A
Size	Standard
