

## Geely Geometry A Car Interior Parts Differential Gear Aluminum Alloy

Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 6608125052
- Minimum Order Quantity: 10
- Price: RMB+623+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Differential
- Color: Silver
- Material: Aluminum Alloy
- Type: Car Interior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Geometry A
- Size: Standard
- Highlight: Car Interior Parts differential,  
Car Interior Parts differential gear,  
Geely Geometry car differential gear

## Product Description

### Geely Geometry A Differential

Geely geometric A differential, as an important part of the vehicle transmission system, has shown excellent characteristics in terms of process, technology, quality, workmanship, advantages and function.

Exquisite craftsmanship:

The manufacturing process of Geely geometric A differential is fine and rigorous. High-precision processing equipment is used to accurately cut and grind various parts of the differential to ensure the high accuracy of size and shape. At the same time, the advanced heat treatment process enhances the hardness and wear resistance of the parts, enabling them to maintain stability in complex working environments.

Advanced technology:

Using cutting-edge differential technology, the torque can be intelligently distributed according to the driving condition of the vehicle. Through the optimized gear design and meshing mode, the friction loss is reduced and the transmission efficiency is improved. In addition, advanced sealing technology is also adopted to effectively prevent the leakage of lubricating oil and ensure the normal lubrication and heat dissipation of the differential.

Reliable quality:

In terms of quality control, we strictly follow a high-standard quality management system. From the screening of raw materials to the testing of finished products, every link is strictly controlled. Advanced testing equipment and methods are used to comprehensively test the performance indicators of the differential to ensure that each differential has excellent quality and reliability.

Fine workmanship:

The surface treatment of the parts of the differential is smooth and delicate, without any defects or defects. The tooth surface of the gear has high accuracy, tight meshing, and stable operation. The matching accuracy of each connection part is high, and the installation is firm, reflecting a very high level of workmanship.

The advantages are obvious:

With excellent torque distribution ability, it can make the outer wheels get more torque and the inner wheels get less torque when turning, so as to achieve smooth and flexible turning. At the same time, its efficient transmission efficiency helps to improve the energy utilization rate of the vehicle and increase the range. In addition, good durability and low noise characteristics provide drivers with a comfortable and reliable driving experience.

Key to the role:

The main function of Geely Geometry A differential is to allow the left and right wheels to rotate at different speeds during driving, so as to ensure that the vehicle can drive smoothly when turning and avoid wheel slipping and excessive wear. At the same time, it can also balance the torque distribution of the front and rear axles and improve the driving stability and passability of the vehicle. In complex road conditions, the differential can automatically adjust the torque according to the grip of the wheel to ensure that the vehicle always maintains good handling performance.

To sum up, Geely Geometry A differential provides a solid guarantee for the excellent performance and stable driving of Geely Geometry A with its exquisite technology, advanced technology, reliable quality, fine workmanship, significant advantages and key role.

Product name	Differential
Color	Silver
Material	Aluminum Alloy
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car model	Geely Geometry A
Size	Standard
