

Geely Geometry A TCM Transmission Control Module Unit System

Our Product Introduction

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 1016040444
- Minimum Order Quantity: 5
- Price: RMB+2082+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Transmission Control Module
- Color: Silver
- Material: Aluminum Alloy
- Type: Car Interior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Geometry A
- Size: Standard
- Highlight: **Geely Geometry Transmission Control Module, TCM Transmission Control Module, Geely Geometry transmission control unit**

Product Description

Geely Geometry A Transmission Control Module

The transmission control module of Geely Geometry A is a key component in the vehicle power transmission system, showing excellent performance in terms of process, technology, quality, workmanship, advantages and role.

Exquisite craftsmanship:

The Geely geometric A transmission control module adopts advanced integrated circuit manufacturing technology. Through high-precision photolithography and etching technology, the electronic components inside the module are arranged tightly and the lines are clear. The strict packaging process effectively protects sensitive electronic components so that they can operate stably in complex automotive working environments.

Advanced technology:

It uses cutting-edge sensor fusion technology and intelligent algorithms. It can accurately collect various working parameters of the transmission in real time, such as speed, torque, oil temperature, etc. With strong computing power and advanced control algorithms, we can make decisions quickly and accurately to achieve accurate control of the timing and strength of transmission shift.

Reliable quality:

In terms of quality control, the Geely geometric A transmission control module follows strict international automotive industry quality standards. Each electronic component has been strictly screened and tested to ensure its stable performance and long service life. At the same time, in the production process, many comprehensive functional tests and aging tests are carried out to ensure that the module works reliably throughout the service life cycle of the vehicle.

Fine workmanship:

The appearance design of the module is simple and beautiful, the interface is smoothly plugged in, and the connection is solid. The internal circuit board is neatly routed and the solder joints are uniform and smooth, showing a fine manufacturing process. Good heat dissipation design ensures that the module can effectively dissipate heat and maintain a stable working temperature when working.

Significant advantages:

With fast response ability, it can adjust the working status of the transmission in an instant, providing a smooth shifting experience. Its high degree of intelligence and adaptability can automatically optimize the shift strategy according to the driver's driving habits and road conditions, and improve driving comfort and fuel economy. In addition, strong fault diagnosis and fault tolerance capabilities ensure that in the event of abnormal conditions, protection measures can be taken in time to ensure the safety of the vehicle.

Key to the role:

Geely geometric A transmission control module plays the core control role. It receives information from various sensors of the vehicle, comprehensively analyzes and issues instructions to the transmission to realize the accurate switching of gears, so that the engine always works in the best working range and improves the power output efficiency. At the same time, it can also coordinate the work of the engine and motor, realize the efficient coordination of the hybrid power system, and provide strong and stable power for the vehicle.

To sum up, the Geely Geometry A transmission control module brings excellent transmission performance and excellent driving experience to Geely Geometry A with its exquisite technology, advanced technology, reliable quality, fine workmanship, significant advantages and key role.

Product name	Transmission Control Module
Color	Silver
Material	Aluminum Alloy
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car model	Geely Geometry A
Size	Standard
