

## Geely Geometry A plastic black brake pedal for vehicle braking

Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

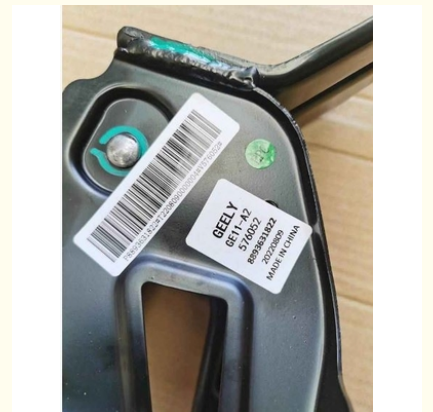

### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 4076034400
- Minimum Order Quantity: 20
- Price: RMB+223+PC
- Packaging Details: carton packaging
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Color: Black
- Material: Plastic
- Type: Car Interior
- Application: Vehicle Braking
- Product Name: Brake Pedal
- Package: Carton Packaging
- Function: Vehicle Braking
- Packing: Carton Packaging
- Weight: Lightweight
- Highlight: **plastic black brake pedal,**  
**Plastic black brake pedal,**  
**Vehicle braking brake pedal**

## Product Description

### Geely Geometry A plastic black brake pedal for vehicle braking

#### Description:

##### Material and appearance:

The brake pedal may be made of plastic, and its appearance design is simple, which matches the overall interior style of the vehicle.

##### Trip and response:

The previous stroke is short and the braking response is fast, which allows the driver to feel the braking effect in time when he needs to slow down. The middle and rear pedal stroke is moderate, with good line and sexy, so that the braking force can be controlled more evenly and accurately.

##### Driving experience:

The overall brake feels heavy, which gives the driver enough confidence. Whether it is frequent braking on urban roads or emergency braking at high speed, it can provide reliable braking performance.

##### Cooperation with other systems:

It cooperates with the electronic stability control system of the vehicle to further improve the safety and handling of the vehicle. In an emergency or when the vehicle is unstable, the electronic stability control system will intervene in time and adjust the strength of the brake pedal to help the vehicle maintain stable driving.

#### Applications:

- Deceleration and parking in daily driving: According to different road conditions and driving needs, control the speed by stepping on the brake pedal to reduce or stop it completely to ensure safe driving, such as when encountering traffic lights, pedestrians, other vehicles or situations that need to be avoided.
- Responding to emergencies: In case of an emergency, such as a sudden obstacle or danger in front of you, you can quickly and powerfully step on the brake pedal to achieve emergency braking to avoid collision or reduce the loss of accidents.
- Maintain a safe distance: During driving, use the brake pedal to control the speed appropriately and maintain a safe distance from the front car.
- Cooperate with other driving operations: use it with the acceleration pedal to achieve a smooth acceleration and deceleration process and make the vehicle more smooth. For example, slow down appropriately before turning to maintain the stability of the vehicle; when climbing, control the speed as needed to prevent the vehicle from slipping backwards.
- Adapt to different road conditions: Under special road conditions such as long downhill sections or slippery roads in mountainous areas, intermittent braking or appropriate braking force control can be used to avoid overheating and failure of the braking system, while maintaining the stability and safety of the vehicle.

#### Specifications:

Color	Black
Material	plastic
Type	Car Interior
Application	vehicle braking
Product name	brake pedal
Package	carton packaging
Function	vehicle braking
Weight	Lightweight

#### Feature Advantage:

- Fast response: the first stroke is short, the braking response is fast, and the braking effect can be produced in time when it needs to be slowed down without obvious delay.
- The line is sexy: the middle and back pedal travel is moderate, the line is sexy, and the braking force can be controlled more evenly and accurately.
- The foot feels heavy: the overall brake foot feels heavy, which can give the driver enough confidence to control the vehicle.
