

## Geely Geometry A Aluminum Alloy Silver Grey Luggage Cabin Door Lock Body

Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 5065505900
- Minimum Order Quantity: 100
- Price: RMB+59+PC
- Packaging Details: carton packaging
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Luggage Cabin Door Lock Body
- Type: Car Body Parts
- Material: Steel
- Color: Gray
- Application: Lock The Luggage Compartment Door
- Packing: Carton
- Quality: Very Good
- Highlight: Alloy Luggage Cabin Door Lock Body,  
Aluminum Luggage Cabin Door Lock Body,  
Luggage Cabin Door Lock Body

## Product Description

### Geely Geometry A Aluminum Alloy Silver Grey Luggage Cabin Door Lock Body

#### Description:

##### I. Materials and processes

Geely Geometry A luggage compartment door lock body is made of high-strength metal materials, which has undergone fine processing and surface treatment. This material is not only strong and durable, can withstand frequent use and various environmental conditions, but also has good anti-rust and corrosion resistance to ensure long-term stable operation.

##### II. Structure and design

The structure of the lock body is exquisitely designed, including the lock cylinder, lock tongue, transmission mechanism and other components. Its compact layout enables the lock body to achieve efficient and reliable locking function in a limited space. The shape and size of the lock tongue are carefully designed to be closely integrated with the lock, providing a strong locking force to prevent the luggage compartment from accidentally opening during driving.

##### III. Convenience of operation

It is very easy to operate the lock of the luggage compartment door. Users can unlock and lock by remote control the key, the button in the car or directly use the key in the luggage compartment. When unlocking, the lock tongue quickly retracts and opens the luggage compartment door easily; when locking, just gently close the cabin door, and the lock tongue automatically pops up and locks, making a clear locking sound, so that users can clearly know that the luggage compartment has been safely locked.

##### IV. Safety performance

Geely Geometry A luggage compartment door lock body has excellent safety performance. It uses advanced encryption technology to prevent illegal opening. At the same time, the strong structure of the lock body can resist the destruction of external forces and the lock-prying behavior, providing reliable protection for the items in the luggage compartment.

##### V. Stability and durability

After rigorous testing and verification, the luggage compartment door lock can maintain stable performance under various extreme conditions. Whether it is cold and hot, humid and dry environment, or frequent switch operation, the lock body can work normally and is not prone to failure. Its durability design ensures reliability after long-term use and reduces the cost of maintenance and replacement.

#### Applications:

The luggage compartment door lock body of Geely Geometry A is mainly used to ensure the safe closing and locking of the luggage compartment. In daily use, it can prevent the luggage compartment from opening by itself due to bumps or accidents during the driving of the vehicle, and ensure that the luggage will not be dropped or lost. When the vehicle is parked, the lock body can prevent unauthorized people from opening the luggage compartment and protect the safety of the property in the car. In addition, in the event of accidents such as collisions, the firm locking of the lock body can prevent the luggage door from deforming and opening, further ensuring the safety of the personnel in the car. Whether it is carrying luggage when traveling or storing items when the vehicle is idle, the luggage compartment door lock plays a vital role in providing users with convenience and peace of mind.

#### Specifications:

Product name	Luggage Cabin Door Lock Body
Type	Car Body Parts
Material	Steel
Color	gray
Application	Lock the luggage compartment door
Packing	Carton
Quality	very good

#### Feature Advantage:

- Convenient operation: You can unlock and lock by remote control the key, the in-car button or directly use the key. The operation is simple and convenient. When unlocking, the lock tongue quickly retracts. When locking, the lock tongue automatically ejects out and locks, and a sound prompt will be issued.
- Safe and reliable: Advanced encryption technology can effectively prevent illegal opening; its strong structure can resist external damage and lock-prying behavior, providing good protection for items in the luggage compartment.
- High stability: After rigorous testing, it can maintain stable performance under various environmental conditions, and is not prone to failure, ensuring the reliability of long-term use.
