

Geely geometry A TPE and glass fiber black and white color matching external rearview mirror

Our Product Introduction

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 6017161000A08
- Minimum Order Quantity: 50
- Price: RMB+54+PC
- Packaging Details: carton packaging
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: External Rearview Mirror
- Color: Black And White Color Matching
- Material: TPE And Glass Fiber
- Type: Car Body Parts
- Application: Expand Your Horizons
- Package: Carton Packaging
- Weight: Light Weight
- Style: Simple, Scientific And Technological Sense
- Highlight: **TPE External Rearview Mirror,
Glass Fiber External Rearview Mirror,
glass fiber external rearview mirror**

Product Description

Geely geometry A TPE and glass fiber black and white color matching external rearview mirror

Description:

I. Appearance design

The external rearview mirror of Geely Geometry A is simple and fashionable. Its smooth lines are perfectly integrated with the overall style of the body, showing an elegant temperament. The mirror body adopts a unique geometric shape design, which not only increases the visual hierarchy, but also improves the overall recognition of the vehicle.

II. Material and craftsmanship

The shell of the outer rearview mirror is made of high-quality engineering plastic, which has excellent wear resistance and impact resistance, and can cope with various scratches and collisions in daily use. The mirror is made of high-definition glass material. After special treatment, it has good anti-glare and waterproof fog functions to ensure a clear vision in different weather and light conditions.

III. Functional Features

1. Electric adjustment: The driver can easily adjust the angle of the external rearview mirror through the control button in the car to get the best viewing field of view.
2. Electric folding: When parking or passing through a narrow section, the external rearview mirror can automatically fold to reduce the width of the body and avoid scratching.
3. Heating function: In cold weather or humid environments, the heating function can quickly remove the fog and frost on the mirror to ensure a clear vision.
4. Integrated turn signals: The design of turn signals on the external rearview mirror is eye-catching, which can effectively convey the steering intention of the vehicle to other road users and improve driving safety.

IV. Vision effect

This external rearview mirror provides a wide and clear field of view, allowing the driver to fully understand the situation on both sides of the vehicle. Whether driving fast on highways or shuttling through urban roads, it can provide drivers with accurate information and help them make timely and accurate driving decisions.

V. Installation and stability

The external rearview mirror is firmly installed. After strict testing and adjustment, it can remain stable during the driving of the vehicle, and is not affected by wind speed and bumpy road conditions. Its strong connection structure and reliable electrical connection ensure the normal operation of various functions.

In a word, the external rearview mirror of Geely Geometry A provides drivers with a safe, convenient and comfortable driving experience with its excellent design, high-quality materials, powerful functions and stable performance, and has become an important part of the appearance and function of the vehicle.

Applications:

- Integrated side turn signal: It can indicate the steering intention of the vehicle to the surrounding vehicle and pedestrians and improve driving safety.
- Electric heating function: In rainy, snow, fog and other weather conditions, it effectively removes water vapor or frost on the rearview mirror to ensure a clear rear view.
- Automatic folding function: When the vehicle is parked or passes through a narrow section, the rearview mirror is automatically folded to reduce the risk of scratching, while also increasing the beauty of the vehicle.
- Blind area monitoring tips: Some models are equipped with this function. When a vehicle enters the blind area of the external rearview mirror, it will prompt the driver through the light on the rearview mirror to help the driver better understand the situation around the vehicle and reduce the possibility of collision when changing lanes or steering.
- Door opening warning: When the driver opens the door, if there is a car or other dangerous factors in the rear, it can be prompted by the light on the rearview mirror to avoid accidents caused by suddenly opening the door.

Specifications:

Product name	external rearview mirror
Color	black and white color matching
Material	TPE and glass fiber
Type	Car Body Parts
Application	Expand your horizons
Package	carton packaging
Weight	light weight
Style	Simple, scientific and technological sense

Feature Advantage:

- Appearance design: It adopts black and white two-color matching. The overall design is simple and fashionable. Some models have also been blackened, which is more sporty. In addition, it may be equipped with an electric shadowless door handle, which is sensitive to operate and adds a sense of technology and advanced to the appearance.
- Integrated turn signal: The two-color external rearview mirror integrates the side turn signal, which is eye-catching and can effectively convey the steering intention of the vehicle and improve driving safety.
- Rich functions: Electric heating and automatic folding functions are standard for the whole series, which can ensure good vision under different weather conditions, and reduce the width of the body when parking or passing through narrow sections to avoid scratching. Some live shooting models are also equipped with blind spot monitoring and door opening warning functions, which prompt drivers and passengers through the lights on the rearview mirror. The external rearview mirror of some models also has an electric adjustment function, which is convenient for the driver to adjust the field of vision.
- Good vision: It can provide a wide and clear vision, so that the driver can fully understand the situation on both sides of the vehicle, which is conducive to making timely and accurate driving decisions.
