### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 1017015959
- Minimum Order Quantity: 100
- Price: RMB+29+PC
- Packaging Details: carton packaging
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Tweeter
- Color: Black
- Material: Plastic
- Type: Car Interior Parts
- Application: Playing Music
- Package: Carton Packaging
- Size: Small
- Weight: Lightweight
- Highlight: **Geometry A tweeter, high quality tweeter, plastic black tweeter**

## Product Description

### Geely Geometry A plastic black high-quality tweeter for playing music

#### Description:

The loudspeaker of Geely Geometry A is an important part of its sound system and has the following remarkable characteristics:

#### Design and material:

The tweeter is usually made of high-quality materials to ensure that the sound is clear and bright. Its exquisite design can effectively convert high-frequency signals into pleasant sounds.

#### High frequency performance:

The tweeter performs well in restoring the high-frequency part of the sound. It can present a clear, transparent and bright treble, so that the details in the music can be fully displayed. Whether it is the treble area of the instrument or the high-frequency part of the human voice, it can be accurately conveyed, bringing you rich and delicate auditory enjoyment.

#### Sound positioning:

A reasonable installation position allows the tweeter to provide accurate sound positioning. For example, it may be installed on the A-pillar, above the dashboard or on the door to be level with the human ear, which can make the sound field basically level with the human ear, so that you can feel that the sound seems to come from a specific direction, and enhance the three-dimensional and spatial sense of the music.

#### Cooperation with other speakers:

The tweeter cooperates with other speakers in the car to create a complete and balanced sound effect. It works with subwoofers and mid-tone speakers, so that the entire audio spectrum can be perfectly presented. When playing various types of music, the tweeter can seamlessly connect with the sound of other frequency bands, making the music more vivid and infectious.

#### Improve sound quality:

Through the excellent performance of the tweeter, the sound quality of the whole car has been effectively improved. Whether you enjoy pop music, classical music or other types of audio content, you can feel a clearer and more layered sound, so that you can enjoy a high-quality music feast in the car.

#### Applications:

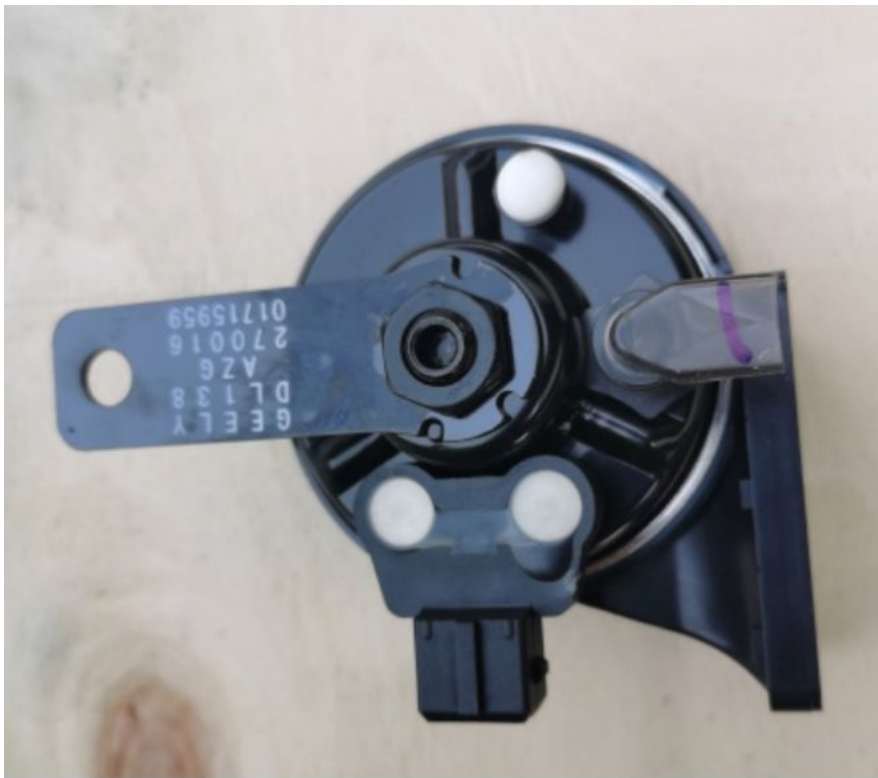

- Improve sound quality: The loudspeaker can present the delicate part of the sound, make the treble part of the music clearer, transparent and brighter, increase the expressiveness and resolution of the sound, and make people feel the details of the music better.
- Improve the sound field: the appropriate installation position of the tweeter can form a better sound field effect. For example, install the tweeter on the A-pillar, above the dashboard, or on the door in a position that is level with the human ear, so that the sound field can be basically level with the human ear, so that the owner can get a more realistic and natural auditory feeling, as if in the music scene.
- Enhance the sense of music hierarchy: Cooperate with other loudspeakers to create rich and hierarchical sound effects, making the whole music more vivid and infectious.

#### Specifications:

Product name	tweeter
Color	black
Material	plastic
Type	Car Interior Parts
Application	playing music
Package	carton packaging
Size	small
Weight	lightweight

#### Feature Advantage:

- Excellent high-frequency performance: it can present a clear, transparent and bright treble, so that the details in the music can be fully displayed. Whether it is the treble area of the instrument or the high-frequency part of the voice, it can be accurately conveyed.
- Accurate sound positioning: A reasonable installation position allows the tweeter to provide accurate sound positioning, such as being installed on the A-pillar, above the dashboard or on the door that is level with the human ear, which can make the sound field basically level with the human ear, so that the driver and passenger can feel that the sound seems to come from a specific direction, which enhances the standing of the music. Sense of body and space.
- It works well with other speakers: it cooperates with other speakers in the car to create a complete and balanced sound effect, and works with the bass speaker and mid-tone speaker, so that the whole audio spectrum can be perfectly presented. When playing various types of music, it can be seamlessly connected with the sound of other frequency bands, so that the sound The music is more vivid and infectious.
