

Black Plate Car Automotive AC Evaporator Core For Geely Geometry A

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 8020022300
- Minimum Order Quantity: 20
- Price: RMB+220+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Plate Evaporator Core
- Material: Metal Materials
- Color: Black
- Type: Car Air Conditioning And Airbags
- Package: Cartoon Packageing
- Quality: Very Good
- Application: Heat Absorption And Refrigeration
- Size: Small
- Highlight: Geely Geometry automotive evaporator core,
Geely automotive evaporator core,
Black Plate car ac evaporator core

Product Description

Geely Geometry A black plate evaporator core for heat absorption and refrigeration

Description:

The evaporator core of Geely Geometry A is like a "cool magician" of the air in the car.

Its materials are carefully selected and have good heat conduction performance, which can efficiently realize cold and heat exchange.

In terms of structural design, the evaporator core has a delicate structure. It is installed in the evaporation box and works closely with other components of the air conditioning system.

When the refrigerant flows through the core of the evaporator, it can quickly absorb the heat in the surrounding air and reduce the air temperature.

The evaporator core of Geometry A has excellent refrigeration efficiency. Whether in a hot summer or a sultry environment, it can quickly create a cool and comfortable space for the car.

At the same time, the evaporator core also pays attention to stability and reliability. Under various working conditions, it can operate continuously and stably to ensure the normal operation of the air conditioning system and provide a long-lasting cool experience for drivers and passengers.

In addition, its exquisite design and manufacturing process can not only effectively improve the cooling effect of the air conditioner, but also have a certain durability, which can withstand the test of long-term use.

In a word, the evaporator core of Geely Geometry A provides an important guarantee for the comfort of the car environment with its efficient refrigeration performance, stable operation and reliable quality, so that you can enjoy pleasant coolness in every driving journey.

Applications:

The function of the car air conditioner evaporator is to evaporate the low-pressure refrigerant from the expansion valve and absorb the heat of the air in the car, so as to achieve the purpose of cooling in the car.

The evaporator core of Geely Geometry A is installed in the evaporation box. When the refrigerant enters the core of the evaporator, it will expand and absorb heat and cool the core of the evaporator. At this time, the wind from the blower passes through the core of the evaporator, and the air outlet of the air conditioner will blow out cold air, so as to reduce the temperature in the car and provide a cool environment for the car. Yes.

In Geely Geometry A, the evaporator core works with other components of the air conditioning system to maintain a comfortable temperature environment in the car. At the same time, its air conditioning system may also have functions such as air purification to improve the air quality in the car and provide a better experience for drivers and passengers. Specifically, the touch button area of Geely Geometry A's air conditioning system is unique, and the functions and options need to be adjusted through the touch screen. The air conditioner has the functions of purifying PM2.5, releasing negative ions, and detecting air quality outside the car.

Specifications:

product name	plate evaporator core
material	metal materials
color	black
type	Car Air Conditioning And Airbags
package	cartoon packageing
quality	very good
application	heat absorption and refrigeration
size	small

Feature Advantage:

- Efficient refrigeration: It can quickly absorb the heat in the surrounding air, reduce the air temperature, and provide a cool and comfortable environment for the car.
- Good heat conduction performance: it helps to achieve efficient cold and heat exchange and improve the cooling efficiency of the air conditioning system.
- High stability: It can continue to operate steadily under various working conditions, ensure the normal operation of the air conditioning system, and provide a long-lasting cool experience for drivers and passengers.

The evaporator core is an important part of the automobile air conditioning system. It works with other components of the air conditioning system to maintain a comfortable temperature environment in the car. Geely Geometry A as a whole has a good performance in terms of endurance mileage, scientific and technological configuration, space utilization, etc. The good performance of its air conditioning system also brings users a comfortable driving experience.
