### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 6015069600B01
- Minimum Order Quantity: 20
- Price: RMB+117+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Sunshade
- Color: Black
- Material: Carbon Fiber
- Type: Car Interior
- Package: Package
- Function: Hide From Sunlight
- Car Model: Geely Xingyue L
- Style: Simple And Atmospheric
- Highlight: **Geely Xingyue I black sunshade, Strong textured black sunshade, High quality black sunshade**

## Product Description

### Geely Xingyue I High-quality and strong textured black sunshade

#### Description:

The sunshade of Geely Xingyue L is exquisitely designed and has the following characteristics:

#### Material and process:

The sunshade is made of high-quality materials and has good durability. Its surface may be specially treated with outstanding texture.

#### Functional design:

1. Effective shading: It can significantly reduce the direct sunlight to the driver and passengers, provide a comfortable driving environment, and avoid the dazzling sunlight affecting the driving line of sight.
2. The unique design of some models: such as the Xingyue L smart version, the lower part of the sunshade is made of transparent material, which not only looks more advanced, but also may have certain special functions, such as effectively blocking the sun without wearing sunglasses.

#### Size and adaptability:

The size design is reasonable, matches the window size of Xingyue L, and can fully cover the area that needs shade. In addition, the sunshade is usually dedicated to special vehicles to ensure perfect integration with the interior of the vehicle.

#### Installation method:

The installation method is convenient and stable, and can be kept stable during use without easily shaking or falling.

#### Style and appearance:

The overall style is simple and generous, which complements the interior style of the vehicle. Its color may be consistent with the color in the car and will not appear abrupt.

#### Convenience of use:

The operation is simple, and drivers and passengers can easily put it down or put it away to meet different light conditions and usage needs.

#### Other features:

Some sunshades may also have some additional functions, such as a makeup mirror, which is convenient for passengers to tidy up their makeup when needed; or have a certain heat insulation performance to further reduce the accumulation of heat in the car.

#### Applications:

1. Block the sun: prevent direct sunlight from shining directly into the eyes of drivers and passengers, and avoid the dazzling sunlight from affecting the driving line of sight or riding comfort.
2. Reduce the temperature of the central control and steering wheel: After exposure to the sun, the sunshade can greatly reduce the temperature of the central control and steering wheel, so as to avoid the hot steering wheel when driving.
3. Protect the interior: prevent long-term direct sunlight from plastic components such as dashboards, and reduce the aging of the interior and the possibility of unpleasant odors and toxic substances due to direct high temperature.
4. The sunshade of some models has special functions: for example, the sunshade of Xingyue L Zhiqing adopts a translucent design similar to sunglasses, which can block some ultraviolet rays and play a role in sun protection to a certain extent.

#### Specifications:

Product name	sunshade
Color	Black
Material	Carbon Fiber
Type	Car Interior
Package	Package
Function	Hide from sunlight
Car model	Geely Xingyue I
Style	simple and atmospheric

#### Feature Advantage:

The sunshade of some models is made of transparent material or a translucent design similar to sunglasses. The advantage of this design is that it can effectively block the sunlight without completely blocking the line of sight. To a certain extent, it reduces the visual blind spot and does not affect driving safety. At the same time, compared with the traditional opaque sunshade, it also has a unique appearance and looks more advanced and fashionable.

For example, the lower part of the sunshade of the Xingyue L Zhiqing version is made of transparent material. Some car owners think that this design is very easy to use, and they don't need to wear sunglasses when driving. In addition, some car owners mentioned that the smart version of the sunshade can block about 50% of the ultraviolet rays.
