### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 6022008700
- Minimum Order Quantity: 50
- Price: RMB+39+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Rear Wiper Assembly
- Type: Car Body Parts
- Material: Steel And Plastic
- Color: Black
- Packing: Carton
- Car Make: Geely Xingyue L
- Quality: Genuine Product,High Level
- Size: Standard
- Highlight: **Black rear wiper assembly,**  
**Alloy rear wiper assembly**

## Product Description

### Geely Xingyue L High-strength plastic and alloy black rear wiper assembly for rear glass

Description:

#### I. Product Overview

The Geely Xingyue L rear wiper blade assembly is an important accessory specially designed for the Geely Xingyue L model, which includes the rear wiper blade, rear rocker arm and related connecting parts.

#### II. Applicable models

Suitable for various models of Geely Xingyue L series, including but not limited to 2021-2024 Geely Xingyue L and Geely Xingyue L hi-p and other related models.

#### III. Design and material

1. It adopts a boneless wiper design, which can better fit the curved surface of the rear window glass and provide a more even scraping effect.
2. The wiper blade is usually made of high-quality rubber material, which has good wear resistance and weather resistance. It can maintain effective wiping performance under various weather conditions and ensure a clear view of the rear window.
3. Components such as the rear rocker arm have been carefully designed and manufactured to ensure a perfect cooperation with the wiper blade to achieve a stable and smooth wiping action.

#### IV. Scraping effect

1. It can quickly and effectively remove rainwater, dust and other debris from the rear window, providing a clear rear view.
2. The scraping angle has been optimized to cover a large area of the rear window and reduce the blind area of scraping.

#### V. Installation and replacement

It is easy to install and does not require complex tools or professional skills. However, the following points should be paid attention to when replacing:

1. Make sure that the vehicle's power is turned off to avoid misoperation causing the wiper to start and damage the front windshield or wiper arm.
2. Operate carefully to prevent the metal part of the scraping arm from scratching the glass surface.

#### VI. Product advantages

1. The special car is perfectly matched with the Geely Xingyue L model to ensure the accuracy and stability of the installation.
2. Original quality or high-quality materials and manufacturing processes ensure their reliability and durability.
3. A good scraping effect helps to improve driving safety, especially in rainy days or when there are stains on the rear windows.

#### Applications:

The main function of the Geely Xingyue L rear wiper assembly is to sweep away the rain, snow, dust or other debris that hinder the view on the rear windshield, so as to provide the driver with a clear rear vision, thus improving driving safety. In rainy and snowy weather or stains on the rear windshield, the rear wiper can effectively remove these obstacles in time to ensure that the driver can observe the rear of the vehicle through the rear windshield, which is very important for lane change, reversing, parking and other operations.

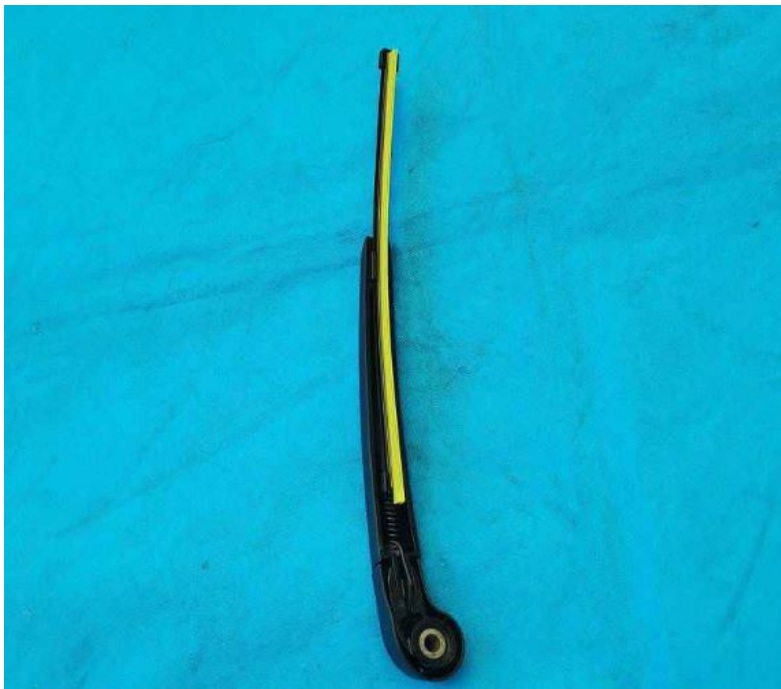

Especially when driving on rainy days, the rain on the rear windshield will affect the driver's judgment of the rear vehicles and road conditions, and the normal operation of the rear wiper can reduce this line of sight interference and help prevent traffic accidents.

#### Specifications:

Product name	rear wiper assembly
Type	Car Body Parts
Material	steel and plastic
Color	Black
Packing	Carton
Car make	Geely Xingyue L
Quality	Genuine product,High Level
Size	Standard

#### Feature Advantage:

- The wiping effect is good: it can effectively sweep away the rain, snow, dust or other debris on the rear windshield, provide a clear rear view, and ensure that the driver can see the rear of the vehicle under various weather conditions.
- Strong adaptability: It adopts the special car design, which is perfectly matched with the Geely Xingyue L model. It is easy to install and can ensure the stability and accuracy of the wiper.
- Excellent material: For example, the use of high-quality rubber material has good wear resistance and weather resistance, can maintain good scraping performance for a long time, and can work normally in different temperature environments.
- Reasonable scraping angle: it can effectively cover most areas of the rear windshield and reduce the dead corners of the back windshield.
- Stable and reliable work: carefully designed and manufactured to ensure stable operation during use and reduce the possibility of failure. Some rear wiper assembly may also have the characteristics of stable rated voltage of the motor to ensure the normal operation of the wiper.
