

## The higher the strength of the high-strength alloy, the gray front fender

### Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

#### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 5035052500C15
- Minimum Order Quantity: 10
- Price: RMB+543+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

#### Product Specification

- Product Name: Front Fender
- Size: OEM Standard Size
- Type: Car Body Parts
- Material: Steel
- Color: Gray
- Application: Protect The Car
- Packing: Carton,normal
- Quality: Genuine Product,High Level
- Highlight: **High Strength Alloy Front Fender,**  
**High Strength Front Fender , Gray Front Fender**

## Product Description

### The higher the strength of the high-strength alloy, the gray front fender

#### Description:

The fender plate at its body is welded with multi-layer steel plate stamping parts. The outermost steel plate is a one-piece stamping part, not a piece of pieces, which helps to ensure the overall strength and appearance integrity of the fender plate. The inside of the fender is hollowed-out, but it is not filled with sound insulation materials, which may lead to wind noise here when driving at high speed.

The sheet metal glue at the inner steel plate of the lower wheel is slightly messy, but because it will cover the resin protective cover, it will not be seen intuitively.

It is worth mentioning that although there is no shock-stop patch inside Binyue's fender cover, two large soft foam materials are designed, which can play a certain role in sound insulation.

#### Applications:

- Block sediment and debris: During the driving of the car, it prevents the gravel and mud rolled up by the wheels from splashing on the bottom of the carriage, which plays a certain protective role in the bottom of the vehicle.
- Optimize the aerodynamic performance: The design of the fender conforms to the aerodynamic principle, which can reduce the wind resistance coefficient and make the car more stable.
- Auxiliary vehicle appearance design: It is an important part of the body cover, which has an important impact on the appearance style of the whole vehicle.

Geely Binyue's fender plate is welded with multi-layer steel plate stamping parts, and the outermost steel plate is an integrated stamping part. Although there is no anti-vibration patch inside the cover, two large soft foam materials are designed, which can play a certain role in sound insulation.

#### Specifications:

Product name	front fender
Size	OEM Standard Size
Type	Car Body Parts
Material	Steel
Color	gray
Application	protect the car
Packing	Carton,normal
Quality	Genuine product,High Level

#### Feature Advantage:

- Multi-layer steel plate stamping and welding: the fender is made of multi-layer steel plate stamping parts, and the outermost steel plate is an integrated stamping part, which is not pieced together, which helps to ensure the overall strength and appearance integrity.
- Set up soft foam sound insulation material: Although there is no anti-vibration patch inside the fender, two large soft foam materials are designed, which can play a certain role in sound insulation and reduce the noise during driving.
