## Product Description

### Geely Binyue's high-strength alloy black front door lock body can lock the door firmly.

#### Description:

Geely Binyue's front door lock body is exquisitely designed with high stability and reliability.

Its material is excellent, strong and durable, and can withstand the test of daily use.

In terms of structure, the design of the lock body is complex but the control is reliable. It works closely with the electronic system of the vehicle to achieve a variety of functions.

From the perspective of operation, whether it is the use of car keys or control buttons in the car, it can easily lock and unlock the door, providing great convenience for drivers and passengers.

When you need to open the door from outside the car, just use the corresponding car key, insert the lock cylinder and operate accordingly, and the lock body will respond accurately and unlock the door.

In the car, through the control button on the door, the driver and passenger can easily lock the car.

In addition, the front door lock body also has a certain safety protection function. It can effectively prevent illegal intrusion and ensure the safety of people and goods in the car.

In the process of vehicle driving, the lock body also plays an important role in ensuring that the door is always tightly closed and will not be opened accidentally.

Its accurate manufacturing process and strict quality inspection ensure the stable operation of the lock body under various environmental conditions.

#### Applications:

- Control the locking and unlocking of the door: Whether you use the car key or the control button in the car, you can easily lock and open the front door, providing convenience for drivers and passengers. When using the car key, insert the lock cylinder and perform the corresponding operation, and the lock body will respond accurately; the lock operation can also be carried out conveniently through the control button on the door in the car.
- Ensure the safety of people and goods in the vehicle: it can effectively prevent illegal intrusion and improve the safety of the vehicle.
- Ensure that the door is tightly closed during driving: When the vehicle is driving, keep the door always closed to avoid accidental opening and ensure the safety of driving.
- Cooperate with other systems of the vehicle: for example, work with the vehicle's electronic system, alarm system, etc. to achieve specific functions or issue corresponding prompts. For example, in some cases, when locking the car, the horn will sound twice to indicate that the door, window, rear door, etc. are not closed. The lock body of some models may also be associated with the anti-theft system, triggering alarms in case of abnormal situations.

#### Specifications:

Product name	front door lock body
Size	OEM Standard Size,Standard
Type	Car Interior Parts
Material	high-strength alloy
Color	Black
Application	lock the door firmly.
Packing	Carton,normal
Quality	Genuine product,High Level

#### Feature Advantage:

- Reliable control: It can accurately perform locking and unlocking operations. Whether it is using the car key or the control button in the car, it can respond stably.
- Easy to operate: both internal and external handles can open the door at will, and it is more convenient to close the lock.
- High security: effectively prevent illegal intrusion and provide good security for people and items in the car.
- Work with the vehicle system: for example, cooperate with the vehicle's electronic system, alarm system, etc. to achieve specific functions. For example, the lock body of some models may be associated with the anti-theft system, and an alarm will be triggered in case of abnormal situations. Some models may also have functions such as automatic locking when driving to further improve safety.
