

## Geely Binyue plastic black refueling port outer cover

Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 5090013400
- Minimum Order Quantity: 100
- Price: RMB+35+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Refueling Port Outer Cover
- Size: OEM Standard Size,Standard
- Type: Car Body Parts
- Material: Plastic
- Color: Black
- Application: Protect The Refueling Port
- Packing: Carton,normal
- Quality: Genuine Product,High Level
- Highlight: **Binyue refueling port outer cover, plastic refueling port outer cover, black refueling port outer cover**

## Product Description

### Geely Binyue plastic black refueling port outer cover

#### Description:

The outer cover of the refueling port of Geely Binyue is an important part of the appearance of the vehicle.

From the perspective of appearance design, its shape is coordinated with the overall style of the body, and the lines are smooth and natural. Its surface may be specially treated with a certain gloss, which makes the appearance of the vehicle more exquisite.

In terms of material, the outer cover of the refueling port is usually made of strong and durable materials, which has good impact resistance and corrosion resistance, and can maintain stable performance under various environmental conditions.

The opening design of the cover plate is more convenient. When the vehicle is unlocked, there is no need for additional operation. It can be automatically unlocked, which is convenient for the owner to refuel. When the vehicle is driving or locked, it will be automatically locked to ensure the safety of the refueling port and prevent foreign objects from entering or fuel theft.

In addition, the outer cover of the refueling port can also play a certain protective role, effectively prevent dust, rainwater and other impurities from entering the refueling port, keeping the refueling system clean, and helping to extend the service life of relevant components.

In the details, its edges may have been carefully processed and fit tightly to the body to avoid gaps and further improve the overall beauty of the vehicle.

Its color matches the color of the car body, making the appearance color of the whole car more uniform and harmonious. In addition, the installation of the outer cover of the refueling port is also very stable and can be used reliably for a long time.

Generally speaking, the outer cover of Geely Binyue's refueling port not only has practical functions, but also has been carefully considered in appearance design and material selection.

#### Applications:

- Protect the refueling port: prevent dust, rainwater and other impurities from entering the refueling port, and keep the refueling system clean.
- Safety protection: When the vehicle is driving or not unlocked, it can be automatically locked to prevent others from opening the refueling port at will, which plays a certain safety protection role and prevents fuel from being stolen.
- Convenient refueling operation: After the car is stabilized and the engine is turned off, it can be easily turned on in a specific way, which is convenient for refueling.
- Indicator function: There may be relevant signs or instructions near the refueling port of some vehicles. The outer cover of the refueling port can display this information, such as marking fuel labels, etc.
- Maintain the appearance of the vehicle: As part of the body, its design is coordinated with the overall style of the body, making the appearance of the vehicle more complete and beautiful

#### Specifications:

Product name	refueling port outer cover
size	OEM Standard Size,Standard
Type	Car Body Parts
Material	Plastic
Color	Black
Application	Protect the refueling port
Packing	Carton,normal
Quality	Genuine product,High Level

#### Feature Advantage:

- Modeling design: Its shape is coordinated with the overall style of the body, and the lines are smooth and natural, which helps to improve the appearance and beauty of the vehicle.
- Strong material: It is usually made of strong and durable materials, with good impact resistance and corrosion resistance, and can maintain stability under various environmental conditions.
- Convenient use: It can be automatically unlocked when the vehicle is unlocked, which is convenient for the owner to carry out refueling operation; and it will be automatically locked when the vehicle is driving or locked to ensure the safety of the refueling port and prevent foreign objects from entering or fuel theft.
- Protective effect: It can effectively prevent dust, rain and other impurities from entering the refueling port and keep the refueling system clean, which is conducive to prolonging the service life of relevant components.
