

Geely Bin Car Body Parts Aftermarket Rear View Mirror High Strength Plastic

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 6017110200
- Minimum Order Quantity: 10
- Price: RMB+871+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: External Rearview Mirror
- Size: OEM Standard Size,Standard
- Type: Car Body Parts
- Material: Plastic,Plastic And Glass
- Color: Black,white Or As Requirement
- Application: Help Expand The Field Of Vision.
- Packing: Carton,normal
- Quality: Genuine Product,High Level
- Highlight: **Geely Bin Car Body Parts,
Car Body Parts Rear View Mirror,
Geely Bin aftermarket rear view mirror**

Product Description

Geely Bin's black and white external rearview mirror made of high-strength plastic can help expand the field of vision.

Description:

Geely Binyue's external rearview mirror assembly is an important part of the appearance and function of the vehicle.

Appearance design:

Its shape is smooth and dynamic, which echoes the body line, showing the overall fashion and sporty temperament of the vehicle. The shell of the external rearview mirror is usually made of high-strength plastic or composite material. The surface is finely painted, has good weather resistance and scratch resistance, and can maintain a bright appearance for a long time.

Mirror characteristics:

The lens is made of high-quality glass, with a clear imaging effect and a wide field of view. Some models may be equipped with lenses with electric adjustment and heating functions, which can ensure that the driver has a clear rear view in different weather and driving conditions.

Functional configuration:

The external rearview mirror assembly integrates a number of practical functions. The electric adjustment function enables the driver to easily adjust the angle of the rearview mirror to adapt to different driving sitting postures and road conditions. The heating function can quickly remove the water vapor on the mirror surface in rainy and foggy weather and keep the mirror surface clear. Some high-end models may also have an electric folding function. When parking or passing through a narrow passage, the rearview mirror can be automatically folded to avoid scratching damage.

Turn signal design:

On the side of the external rearview mirror, the turn signal is usually integrated. These turn signals are uniquely designed with moderate brightness, which can effectively convey the steering intention of the vehicle to other road users and improve driving safety.

Installation and stability:

The installation method is firm and reliable, and it is connected to the body through strong brackets and screws. In the process of vehicle driving, it can withstand wind resistance and vibration when driving at high speed and maintain a stable working state.

In a word, Geely Binyue's external rearview mirror assembly not only perfectly integrates with the body in appearance, but also provides convenience and security for drivers in terms of function.

Applications:

- Provide rear and side vision: help the driver observe the rear, side and bottom of the vehicle, expand the field of vision, and reduce blind spots, which is the most basic and important use. Drivers can directly obtain important information outside the car through external rearview mirrors, and keep abreast of the dynamics of surrounding vehicles, pedestrians, etc., so as to make correct driving decisions, ensure driving safety, and prevent traffic accidents.
- Convenient lane change and overtaking: When changing lanes or overtaking, the driver can judge the position and speed of the rear vehicle by observing the external rearview mirror to ensure a safe lane change or overtaking distance.
- Assisted reversing: When reversing, the external rearview mirror allows the driver to understand the environment behind the vehicle, including the location of obstacles, other vehicles, etc., which helps to accurately complete the reversing operation.
- Heating function: In rainy and foggy weather, the external rearview mirror heating function can quickly remove water vapor on the mirror surface, keep the mirror surface clear, and ensure that the driver can see the rear situation clearly.
- Electric folding function: The external rearview mirror of some Geely Binyue models has an electric folding function, which can shrink when passing through narrow sections to improve the passability of the car. When the driver leaves the car, it can also be folded to protect the mirror, and can also reduce the parking space to effectively avoid scratching.

In addition, some external rearview mirrors may also be integrated with turn signals, which can convey the steering intention of the vehicle to other road users and further improve driving safety.

Specifications:

Product name	external rearview mirror
Size	OEM Standard Size,Standard
Type	Car Body Parts
Material	Plastic,Plastic and glass
Color	Black,white or as requirement
Application	help expand the field of vision.
Packing	Carton,normal
Quality	Genuine product,High Level

Feature Advantage:

- Unique design: Using the "Super Storm" design language, the appearance is fashionable and sporty, and the carbon fiber-decorated external rearview mirror adds a sporty atmosphere to the vehicle.
- Electric adjustment function: The driver can easily adjust the angle of the external rearview mirror through the in-car button to get the best view.
- Heating function: It can quickly remove water vapor from the mirror in rainy and foggy weather, keep the mirror clear, ensure that the driver can see the rear situation clearly, and improve driving safety.
- Integrated turn signal: It can convey the steering intention of the vehicle to other road users and further improve driving safety.
- Moderate size: It can provide a good field of view to help the driver observe the rear and side of the vehicle.
- Automatic folding function: The external rearview mirror of some models has an electric folding function, which can shrink when passing through narrow sections to improve the passability of the car; folding it when the driver leaves the car can protect the mirror and reduce the parking space, and effectively avoid scratching.
