

## Geely Binyue Vehicle Body Parts car Windshield Wipers Black Plastic

Our Product Introduction

for more products please visit us on [auto-partsspare.com](http://auto-partsspare.com)

### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 6020021500
- Minimum Order Quantity: 100
- Price: RMB+38+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Wiper
- Size: OEM Standard Size,Standard
- Type: Car Body Parts
- Material: Plastic
- Color: Black
- Application: Clean The Front Windshield.
- Packing: Carton,normal
- Quality: Genuine Product,High Level
- Highlight: **Geely Binyue vehicle body parts, vehicle body parts Windshield Wipers, Black Plastic car windscreen wipers**

## Product Description

### Geely Binyue's high-strength plastic black wiper can clean the front windshield.

#### Description:

##### I. Product Overview

Geely Binyue special wiper blades provide a clear vision guarantee for your car.

##### II. Design features

1. With a boneless design, this structure allows the wiper blade to fit perfectly with the windshield, which has the advantages of clean water, no shaking, good mute effect, long service life, etc.
2. The original factory quality ensures a perfect match with the Binyue model, and the installation is convenient, stable and reliable.

##### III. Applicable models

It is suitable for Geely Binyue, Binyue New Energy, Binyue pro, Binyue X and other related models. Some models may need to contact customer service to check the interface.

##### IV. Functional advantages

1. Clean water: Even on rainy days, it can quickly and effectively remove rainwater from the windshield, so that you can maintain a clear vision.
2. Silent work: During operation, the noise is extremely low, creating a quiet and comfortable driving environment for you.
3. Durable: Under normal use, it has a longer service life than a general bone wiper.

##### V. Suggestions for use and maintenance

1. Normal maintenance can improve the service life of the wiper. It is recommended to check the wiper status regularly and keep the glass clean. When the car is parked outside, if there is a gum or foreign object falling on the glass, it should be cleaned in time to avoid a notch in the wiper, so as not to affect the wiping effect and reduce its service life.
2. Add special glass detergent in time, and do not add water or soapy water at will.
3. If it is found that the rubber is hardened, cracked, or the wiper leaves scratches on the window glass or cannot be cleaned in a certain area, it is necessary to replace the wiper blade for driving safety. When replacing, it is recommended to use a wiper blade of the same size as the original wiper.

##### VI. Replacement steps (take the 2022 Binyue as an example)

1. Turn off the power of the vehicle and pull the wiper assembly away from the windshield.
2. Press the buckle above the rain scraper.
3. Pull the wiper blade in the direction of the arrow and loosen it from the wiper arm.
4. Take off the old wiper blades.
5. Slide the new wiper blade into the wiper arm until you hear the "click" sound and confirm that the wiper is in place.
6. Fold the wiper arm back on the windshield and return the wiper to its normal position.

#### Applications:

- Provide a clear vision: In rainy days, quickly and effectively remove the rainwater on the windshield, so that the driver can see the road ahead; in normal times, it can also remove foreign objects such as dust on the windshield.
- Tight fit, clean water: The boneless wiper used by Binyue can be completely fit with the windshield, and the water is clean and does not shake. It is supported by a guide steel strip, and each part can be applied relatively evenly. Compared with the traditional bone wiper, it has a better fit with the glass.
- Silent work: The noise is extremely low during operation, creating a quiet and comfortable driving environment.
- Automatic induction function (some models): Some high-end models of Geely Binyue are equipped with automatic induction wipers. The rain data is collected through the rain sensor. The computer adjusts the movement speed of the wiper according to the size of the rainfall on the glass, and there is no need to manually adjust the wiper speed. Automatic induction wipers can provide drivers with a better vision and ensure the safety of driving.

#### Specifications:

Product name	wiper
Size	OEM Standard Size,Standard
Type	Car Body Parts
Material	Plastic
Color	Black
Application	clean the front windshield.
Packing	Carton,normal
Quality	Genuine product,High Level

#### Feature Advantage:

- The use of boneless design: without the support of the hanger, not only can the wiper blade and the windshield glass have a good fit, but also the wiper is clean and does not shake. It is supported by a guide steel strip, and the force of each part is uniform, which is good for both the scraping effect and reducing the wear of the glass; noise during use It is relatively small, which increases the quietness of driving to a certain extent.
- Automatic induction function: Some models are equipped with automatic induction wipers, which sense the size of raindrops through the rain sensor and automatically adjust the running speed of the wiper. After the rain sensor collects the rain data, the computer will adjust the movement speed of the wiper according to the size of the rainfall on the glass to provide the driver with a better vision and ensure the safety of driving. As long as the driver dials the switch to the auto gear, he can freely adjust the sensitivity of the wiper without manual intervention.
- Good cleaning effect: It can effectively remove rainwater, dust and other foreign objects on the windshield and maintain a good vision.
- The design of the rear wiper is reasonable: the rear wiper is also a boneless wiper, which is enough for the smaller rear windshield, and the parking position of the front and rear wipers is relatively low, which is helpful for reducing wind resistance.
- Convenient and stable installation: the original factory quality ensures a perfect match with the Binyue model, easy to install and stable and reliable during operation.
