Product Description

Geely Binyue simple and atmospheric leather material gray-white top cover interior plate

Description:

The panoramic sunroof design makes the car well lit and has a wide view. In terms of the frame around the roof, there is no special reinforcement structure, and there is only a narrow reinforcement in the C-pillar position.

The roof interior panel fits a large area of native sound insulation cotton, which can effectively isolate external noise and create a quiet and comfortable environment for the car.

The rear position of the roof is affixed with a butyl adhesive shock absorber, which can further reduce vibration and noise. The wire harness here is wrapped in woven cloth, and some places are exposed.

In addition, there are many highlights in other parts of Binyue's car. For example, the interior panel of the door also fits a large area of native sound insulation cotton to effectively improve the sound insulation effect; the front and rear doors are made of splicing technology. After removing the interior panel, it can be seen that the inner steel plate has a large area, and the glass window lifter is integrated on the inside of the door panel, which is easy to maintain. The front door panel uses environmentally friendly and high-cost butyl rubber shock absorber. The main protective structure is a round steel anti-collision beam and is supplemented by a reinforced structure.

The seats in the car are ergonomically designed to provide a comfortable ride. Some models are equipped with a leather multi-functional steering wheel, with a cool shape and a youthful and sporty atmosphere. There is also a new 7-inch dazzling high-definition LCD instrument and a 12.3-inch high-definition touch screen. The former makes the driving information clear at a glance, while the latter is as smooth as a smartphone, and you get what you want. The center console in the car is centered on the driver. Some models are equipped with a floating all-in-one dual screen, which can realize dual-screen interaction and three-finger flying screen functions, and provides a variety of interior color matching options to meet the aesthetic needs of different consumers.

Generally speaking, Geely Binyue's top cover interior panel and the entire interior design not only pay attention to functionality and comfort, but also show a certain sense of fashion and technology.

Applications:

- Improve the beauty of the car: match the overall interior style of the vehicle to create a comfortable and fashionable interior environment.
- Sound insulation and noise reduction: The large area of native sound insulation cotton on its surface can effectively isolate external noise and provide a relatively quiet driving space for the people in the car.
- To a certain extent, the roof structure is enhanced: although most of the roof area of Geely Binyue is glass, and there is no special reinforcement structure, there is a narrow reinforcement bar in the C-pillar position, and the rear position of the roof is also close to the butyl rubber anti-vibration sticker, which can play a certain strengthening role. In addition, the interior panel also plays a certain role in protecting the roof.

Specifications:

Product name	top cover interior plate
Color	white
Material	leather material
Type	Car Interior
Application	Auto Car Inside , Car
Package	Standard/Protective
Car model	Geely Binyue
Style	simple and atmospheric

Feature Advantage:

- Improve the interior aesthetics of the car: match the overall interior style of the vehicle to create a comfortable and fashionable interior environment.
- Sound insulation and noise reduction effect are good: its surface is matched with a large area of native sound insulation cotton, which can effectively isolate external noise and provide a relatively quiet driving space for the people in the car.
- Some positions have a shock stop design: the rear position of the roof is matched with the butyl rubber shock absorber, which can further reduce vibration and noise.

However, Geely Binyue's different configurations and annual models may have some differences in the top cover interior panel.

In addition, there are many highlights in other interiors of Binyue. For example, some models use a leather multi-functional steering wheel, which is cool in shape and releases a young and sporty atmosphere. It is equipped with a floating integrated dual screen with a size of 10.25 inches + 12.3 inches, which can realize dual-screen interaction and three-finger flying screen functions. The seats are made of imitation leather and suede. Among them, the sports seats made of suede are made of shell bionic face backrest and high elastic waist support, providing a more comfortable riding experience, and support remote heating control, FACE ID seat memory function, hip wing support and other functions.
