### Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 1017040099
- Minimum Order Quantity: 300
- Price: RMB+15.6+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

### Product Specification

- Product Name: Rear License Plate Light
- Color: Black
- Material: Plastic
- Type: Car Interior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Weight: Super Light
- Car Make: Geely Binyue
- Highlight: **Black rear license plate light**

## Product Description

**The black rear license plate light of Geely Binyue's plastic LED light source can illuminate the rear license plate.**

Description:

It uses [specific type] light bulbs, such as LED light sources. LED has the advantages of low power and strong brightness. Compared with traditional halogen lamp sources, it can provide better lighting effects on cars, and there is no need for stabilizers, and the lighting speed is extremely fast.

The design of the rear license plate lamp is exquisite and ingenious, which complements the overall shape of the rear of the vehicle. Its unique [shape or design details] not only improves the beauty of the vehicle, but also has a high degree of recognition.

In terms of lighting effect, the rear license plate light can clearly illuminate the license plate, ensuring that normal vision at night can see the license plate number within 20 meters, which meets the requirements of relevant laws and regulations.

In addition, the rear license plate light is closely matched with the circuit system of the vehicle, which is usually controlled by the same switch as the small light, which is convenient and simple to operate.

The careful design of Geely Binyue in details reflects the importance it attaches to quality and user experience. The rear license plate light assembly also adds a highlight to the overall appearance and convenience of use of the vehicle.

Applications:

First of all, its most basic use is to provide sufficient and uniform lighting for the rear license plate of the vehicle. This ensures that the license plate of the vehicle is clearly visible at night, in low light conditions or in bad weather, and meets the requirements of road traffic safety regulations. The clear license plate display helps the traffic management department and other road users to accurately identify the vehicle and ensure traffic order and public safety.

Secondly, the rear license plate lamp also plays a certain decorative and aesthetic role. It integrates with the overall design of the rear of the vehicle and becomes a part of the rear shape, which enhances the integrity and coordination of the appearance of the vehicle, and improves the overall beauty and recognition of the vehicle.

In addition, in some cases, the lighting of the rear license plate light can also assist the work of the camera or sensor behind the vehicle, providing certain auxiliary lighting for reversing images, automatic parking and other functions, and improving the accuracy and reliability of these systems in low-light environments.

Generally speaking, Geely Binyue rear license plate light assembly plays an important role in ensuring legal compliance, improving vehicle beauty and auxiliary vehicle-related functions.

Specifications:

Product name	rear license plate light
Color	Black
Material	plastic
Type	Car Interior
Application	Car Inside,Auto Car
Package	Standard/Protective
Car make	Geely Binyue
Weight	Super light

Feature Advantage:

- Good lighting effect: LED light source, compared with traditional halogen lamp source, has the advantages of low power and strong brightness. It can clearly illuminate the license plate at night or under low light conditions to ensure that it meets the requirements of relevant laws and regulations, that is, normal vision can see the license plate number within 20 meters.
- Coordinate with the overall design: The design of the rear license plate light is integrated with the overall shape of the rear of the vehicle, which improves the integrity and coordination of the appearance of the vehicle, and enhances the aesthetics and recognition of the vehicle.
- Energy-saving and fast lighting speed: the LED lamp source does not need a stabilizer, the lighting is extremely fast, and it is relatively energy-saving.
