

Geely Binyue's plastic black very durable subwoofer

Our Product Introduction

for more products please visit us on auto-partsspare.com

Basic Information

- Place of Origin: China zhajiang
- Brand Name: GEELY
- Model Number: 7072004500
- Minimum Order Quantity: 200
- Price: RMB+43+PC
- Packaging Details: carton packaging,
- Delivery Time: 20-30Work days
- Payment Terms: MoneyGram
- Supply Ability: 50000+PC+30day

Product Specification

- Product Name: Subwoofer
- Color: Black
- Material: Plastic
- Type: Car Inerior
- Application: Car Inside,Auto Car
- Package: Standard/Protective
- Car Model: Geely Binyue
- Weight: Super Light
- Highlight: **Geely Binyue durable subwoofer, black plastic car subwoofer, car interior subwoofer parts**

Product Description

Geely Binyue's plastic black very durable subwoofer

Description:

Geely Binyue's bass speaker is made of plastic, which has certain characteristics and advantages.

From the perspective of appearance design, the use of plastic material makes the horn lightweight and does not add too much weight to the vehicle. At the same time, the well-designed shape can match the layout and style of the interior of the vehicle and maintain overall coordination.

In terms of sound quality performance, this bass speaker can show a certain performance. Although it is made of plastic, through reasonable design and adjustment, it can provide relatively full sound in the bass area and add a certain low-frequency effect to the vehicle sound system. When playing music, you can feel the presence of bass and enhance the rhythm and atmosphere of the music.

However, it should be noted that compared with some higher-end materials, plastic materials may have certain limitations in some aspects of sound quality. For example, in terms of the diving depth and strength of the bass, it may not be comparable to the top audio equipment. However, considering the overall positioning and cost factors of Geely Binyue, this plastic bass speaker can still play a good role in meeting daily basic music needs.

In terms of durability, plastic materials have a certain degree of corrosion resistance and wear resistance, and can maintain a good state in daily use. It can adapt to various environmental conditions in the car and has a certain stability.

Generally speaking, Geely Binyue's plastic woofer is a choice based on comprehensive consideration of cost, performance and overall design of the vehicle. It provides a certain bass support for the vehicle sound system, which meets the music enjoyment needs of most users during daily driving. At the same time, it also has a certain degree of durability and adaptability.

Applications:

- Play the bass part of the music: it can show a certain low-frequency performance, add a low-frequency effect to the vehicle sound system, make the music more rhythmic and atmosphere, and enhance the expressiveness and appeal of the music.
- Improve the overall effect of the sound system: Cooperate with tweeters, midlo speakers, etc. to form a complete sound system to present a richer and more balanced sound.
- Enhance the music atmosphere in the car: Create a better music environment in the car, so that drivers and passengers can enjoy better music during driving, which helps to relieve driving fatigue and improve driving fun.
- Cover up some low-frequency noise: to a certain extent, cover up the low-frequency noise such as engine sound, driving trill and wind sound generated during the driving process of the car, so as to improve the quietness of the car.

Specifications:

| | |
|--------------|---------------------|
| Product name | subwoofer |
| Color | Black |
| Material | plastic |
| Type | Car Interior |
| Application | Car Inside,Auto Car |
| Package | Standard/Protective |
| Car model | Geely Binyue |
| Weight | Super light |

Feature Advantage:

1. Cost balance: Under the premise of controlling costs, it can meet the basic daily bass needs, provide a certain low-frequency effect for the vehicle sound system, and make the music more rhythmic.
2. Cooperate with the overall sound system: Cooperate with other speakers in the car (such as tweeters, mid-tone speakers, etc.) to create a relatively balanced sound effect to present a more complete sound spectrum.
3. Transient response: Some woofers may have a good transient response, which can respond quickly when playing music, making the bass sound cleaner and neat, and there will be no obvious delay or sluggish feeling.
4. Volume performance: It can provide a certain degree of low volume, and can bring the corresponding atmosphere and strength when expressing some music that needs to emphasize low frequency.
